SEED WAREHOUSE,
399 GEORGE ST., SYDNEY.

March, 1906.

OUR SEED ANNUAL for 1906

is presented in a new form. The increasing lists of Seeds and Plants have been very carefully revised, old varieties cut out, and only the BEST in each section offered; moreover, the lengthy descriptions of sorts now so well known have been reduced, and greater space given to our long lists of Novelties. We are annually introducing so many new things that this is really demanded, and we feel sure our issue for 1906 in its present form will be found very concise and useful.

For 1907 we purpose printing a catalogue superior to anything we have previously issued.—To those new clients who may not have a copy of our last large Catalogue we shall have pleasure in sending one on application.

With thanks to all who have given us a largely increased business during 1905, which is still on the increase for 1906.

We are, very faithfully, *Anderson & Co.*

We Pay Carriage or Postage on all retail orders for Vegetable and Flower Seeds and Bulbs, but not on Agricultural Seeds, Seed Grain, Implements, Trees, or Plants.

We do not deliver free any heavy Seeds, such as Peas and Beans ordered in bulk, or Peas and Beans quoted by the quart or bushel on page **6.**

We Deliver Free at prices named Vegetable Seeds quoted by lb. on page **6.**

We do not deliver free, **except** at **Post Rates**, any Peas and Beans ordered by the pint or quart, or pay the carriage on **general orders** for Trees and Plants.

For Index See Last Page

TERMS OF SALE

IT must be clearly understood that we give no guarantee as to the correctness of name, description, or product of the seeds we sell, and any purchaser who does not accept our seeds on these conditions is at liberty to return them, at our cost, within seven days from date of purchase. Our business system is as perfect as we can make it, but still we are not infallible. The best guarantee our Customers can have is the fact that our large business has been built up by **selling good seeds**, and it would very soon be ruined **if we sold inferior stock.**

Please Send Cash with Orders—it saves an enormous amount of work, and secures a discount of 5 per cent. off retail orders for Vegetable Seeds, Flower Seeds, Bulbs and Plants, or extra Seeds, Bulbs, or Plants, to an equivalent value.

Our Credit Terms are Quarterly Accounts, but we require satisfactory references before opening new Accounts.

How to Remit.—Remittances can be made by crossed cheques, bank drafts, or postal notes; for very small amounts, postage stamps may be sent. Please add 6d collection on all cheques under £1.

THE LATE GEORGE ANDERSON

SINCE our last Catalogue was issued we have had to mourn the loss of our senior partner, MR. GEORGE ANDERSON, who founded this business as far back as 1863, and directed its policy for over 40 years. We deem it fitting to record our tribute of affection and esteem to the man of wide outlook and generous heart, who sought not notoriety of place, but lived doing good, and died loved and regretted, May 10th, 1905.

Asparagus

Asparagus

6d and 3d per packet.

Connover's Colossal. **Purple Dutch.**
Camden Park Strain. **The Palmetto.**

CULTURE. Plants are easily obtained from seed sown in July or August in good, rich soil. The plants should be thinned out in the seed bed to six inches apart, and in the autumn the bed should be heavily manured with stable manure, and a good dressing of salt or nitrate of soda should be spread over it. In the autumn of the second year the roots can be transplanted.

Price of Roots, see page 5.

Globe Artichoke

6d and 3d per packet.

Large Green. **Large Purple.**

CULTURE. The soil requires to be deeply trenched, and well enriched with manure. Sow in beds of light soil in March or September, and transplant during the following autumn or spring, in rows four to six feet apart, and about four feet in the rows.

For Plants see page 5.

Jerusalem Artichoke

Purple or White.

See page 5 for price of Tubers.

Asparagus Pea

6d and 3d per packet.

DWARF and trailing habit, and it produces an abundance of crimson pea-shaped flowers; these are succeeded by strangely-shaped pods, which, when cooked, possess a most delicate flavour like Asparagus.

Beet

1s per oz. 6d and 3d per pkt.

Anderson's Extra Early Turnip Rooted. A beautiful deep crimson round variety.

Improved Blood Turnip. Globular shape, bright blood red.

Eclipse. A very early variety, dark red, perfectly round.

Egyptian Turnip Rooted. Flat in shape, with blood red flesh.

The Turnip Rooted varieties are earlier than the long-shaped sorts.

Anderson's Long Blood Red. Finest table Beets. 12 in. long.

Nutting's Dwarf Long Red. An old favourite sort.

CULTURE. Sow in rows 18 to 24 in. apart; thin out to 10 or 12 in. Sow every month from July to December, and again about February or March.

For Assorted Boxes of Vegetable Seeds, see page 6.

Anderson's Long Blood Red Beet

Spinach Beet

1s per oz.; 6d and 3d per pkt.

Giant. Its pure white stalks when cooked are not unlike Seakale.

"I always had splendid Vegetables from your Seed, and have taken prizes at Bemboka Show with Beet, Parsnip, Swede and White Turnip, Succession Cabbage, also won 2 years in succession with Mammoth Pansies grown from your Seed.—MRS. D. N. WILLIAMS, *Nimitybelle.*—*15-8-05.*

Brussels Sprouts

1s per oz.; 6d and 3d per packet.

Rosebery. Early; very fine and tender.

Improved. An excellent variety.

CULTURE. Sow in June and August, and in November to February. Plant out in rows two feet apart.

Borecole or Kale

9d per oz.; 6d and 3d per packet.

Dwarf Green Curled. Only suitable for the colder districts.

CULTURE. Sow in seed beds in January and June, and treat as Cabbage.

Broccoli

1s 6d per oz. 6d and 3d per packet.

Adams' Early White. **Knight's Protecting.**
Elletson's Mammoth. **Walcheren.**

CULTURE. Sow for the main crop in December, January and February, and again in June or July. Good, strong, richly manured soil is necessary to produce Broccoli to perfection.

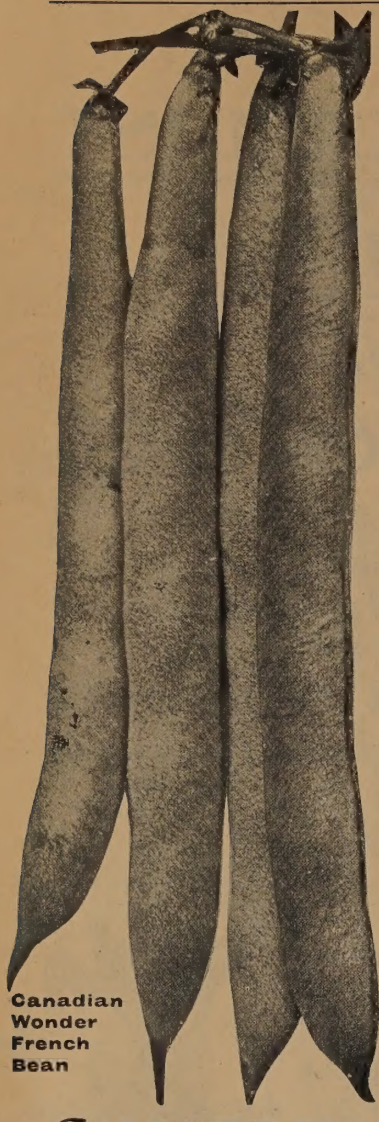
Snake Beans

(Chinese or Yard Long).

6d per oz.; 6d and 3d per packet.

PODS about two feet in length, stringless and of good flavour, like French Beans, and used in exactly the same way. Plants grow six feet.

Anderson's Improved Blood Turnip Beet



Canadian Wonder French Bean

French Beans

1s 6d qt. (post free, **2s**) **6d** and **3d** per pkt.

DWARF VARIETIES

Canadian Wonder. Best green pod French Bean grown.
Burpee's Stringless Green Pod. A first-class Bean; early and prolific.
Negro Long Pod. Fine quality. **Pale Dun.** Old favourite
Governor Denison. Excellent flavour.

RUNNER VARIETIES

White Dutch. Tall grower. **Zebra, or Napoleon.** A good variety.
Scarlet Runner. For the colder districts of the State.

CULTURE. Sow the dwarf sorts from September to February inclusive, in rows two feet apart, and four to six inches from plant to plant. The Runners three to four feet between the rows, and about 12 inches in the rows, in September, October, or November, and staked.

Butter Beans (Stringless)

1s 6d per qt. (post free, **2s**); **6d** and **3d** per pkt.

The "Startler." Pods 6 in. long, perfectly stringless.
Anderson's Wonder. One of the best.
Yosemite Mammoth. Strong grower, pods golden colour.
Mont d'Or or Golden Butter (Tall). Grows about 6 feet.

CULTURE. Same as French Bean.

Broad Beans

1s per qt. (post free, 1s 6
6d and **3d** per packet.

Anderson's Giant Long Pod. Pods from 15 to inches long, with eight or nine beans in each.
Broad Windsor. Bears immense crops.
Early Long Pod ("Hangdown"). Favourite.

CULTURE. Strong loam and clayey soil suit this useful veg table. It does not require much manure if the land has been manur for the previous crop. Sow in March, April, May, June, and July, drills three to four feet apart, and twelve inches in the rows.

Lima Beans

2s per qt. (post free, **2s 6**
6d and **3d** per packet.

Without doubt, one of the most productive and delicious Beans cultivation. The beans are shelled when half or fully grown.

King of the Garden (Tall). Best tall growing variety.
Burpee's Dwarf. The best dwarf type.
Henderson's Dwarf. Very prolific variety.

CULTURE. Sow the Beans in October, November, or Decer ber, in good loamy soil if possible, which has been well enriche The tall variety should stand four feet apart, and the dwarf eighte inches apart.

Cabbage

Hints on the Cultivation of Cabbage
The two main sowings, in December and March, should be made in richly-manured beds. Two successive crops must not be planted in the same ground, after Turnips, or any of Brassica tribe.

9d per oz.; **6d** and **3d** per packet.

For SPECIAL PRICES to Market Gardeners and Large Growers see page 6

Anderson's Improved St. John Day. One of the finest summer Cabbages; will heart during the hottest month Can be sown at any time of the year. **St. John's Day (early).** Matures very quickly and stands well; one of the bes
Burpee's All Head Early. Short stemmed and compact. Grown all the year round. **1/-** per oz.; **4/-** per ¼lb.; **15/-** per l

Flat Dutch. Winter variety, late. **Anderson's Defiance Red Pickling Cabbage.** Large solid head

CABBAGE PLANTS

Can be supplied from January to December

Particulars on page 5

SUCCESSION CABBAGE

15/- per lb.; **4/-** per ¼-lb.; **1/-** per oz.; **6d** and **3d** per pkt.

This standard variety still maintains its position as **the best** market gardeners' Cabbage that is grown in the State.

For Autumn and Spring sowing it is excellent, but may now be said to be an **all-the-year-round variety.** Short-stemmed, has enormous flat heads, of fine texture and quality.

Our Packet Seeds are Post Free everywhere

Succession Cabbage

Savoy Cabbage

9d per oz.; **6d** and **3d** per packet.
Drum Head. **Dwarf Green Curle**

Does well in the cooler parts of our State. CULTURE. Same as Cabbage.

Cape Gooseberry

6d and **3d** per pack
Makes a delicious jelly.

Giant Cape Gooseberry. Of erect habit; from 1½ to 2 feet high.

CULTURE. Sow in September, and prick out in a row along a warm sheltered border rich soil, 2 feet apart. Pinch out the top of the shoots occasionally to induce a bushy growth.

Carrot

9d per oz.; **6d** and **3d** per packet.

St. Valery. An excellent scarlet Carrot of fine quality.
Improved Scarlet Intermediate. Early and excellent.
Scarlet Long Horn. Medium length, very early.
Early Short Horn. Very early, and a favourite.
Long Red Surrey. Grows to perfection on deep rich land.
Large Red Altringham. Long red, coarse, for domestic use.

CULTURE. Make sowing in July, and main crop in September; thin out to 5 or 6 in. Sand and sandy loam produce best Carrots. They should follow some crop for which the land has been well manured.

"I have had excellent results from your Succession Cabbage Seed. It is the best all round Cabbage I have seen. We, i.e., the small Gardeners, find your 3d. packets a great boon.
C. BOWDITCH,
Reefton.
19-9-05.

Cauliflower

1s 6d per oz.; **6d** and **3d** per packe
(Except otherwise marked.)

Veitch's Autumn Giant. Very large, snow-white firm heads, requiring plen of room. Best months to sow are December, January and February.
Anderson's White Queen. Very early and dwarf, beautifully white and tende **3s 6d** per oz.
Early London. A first-class early variety.
Large Asiatic. Large variety, of fine quality. **Walcheren.** Good reliable so

CULTURE. Sow in rich, light soil in December and January; shade with boughs. Duri dull or showery weather plant out in rows. Cauliflowers should never follow a Cabbage crop.

= Anderson & Co., Seedsmen and Plant Merchants, Sydney =

Cucumber
6d and 3d per packet.

Anderson's Best of All. Magnificent white spined Cucumber. **1s** pkt.
Anderson's Market King. Long prickly.
Commercial. Early, hardy, productive, 6 to 8 in.
Choice Long Green. Fruit 18 in., fine flavour.
Long Green Prickly. Crisp and delicious.
Short Green Prickly. Good sort small gardens.
Rollison's Telegraph. Long green variety.
ChatsworthWhite Spine. Dark green, 2 ft.
Crystal White. Firm flesh, good keeper, early.
Fordhook Pickling. Fruits in enormous quantities.
Thorburn's Everbearing. Excellent pickling.
Green Gherkin. Small fruit, only for pickling.
Apple-shaped. Round, fine white tender flesh.
Japanese Climbing (Green). Early, prolific.

CULTURE. Make first sowing in the open ground about middle of August, successional sowings in September and October. Ground should be mulched with manure, and the plants watered if necessary.

Cress
6d and 3d per packet.

Triple Curled. English favourite, excellent salad.
Water Cress. Sow in moist land, or on a creek bank. **1s 6d** per oz.
American or Land Cress. Used as a Water Cress during winter. **1s** per oz.

CULTURE. Curled Cress—Sow thickly every 2 or 3 weeks, with or without a dash of Mustard seed. **Water Cress** can be raised from seed sown in a situation where it can be flooded or freely watered.

Celery
1s per oz. 6d and 3d per packet.

WHITE VARIETIES.

White Plume. First-class variety, very tender.
White Solid Paschal. Fine flavour, self-blanching.
Winter Queen. Ribs solid, crisp, nutty flavour.
Cole's Crystal White. Crisp, well flavoured.
Wright's Selected Giant White. Tender and crisp, blanches well.
Turner's Incomparable White. Old favourite, very fine quality.

RED VARIETIES.

Rose Ribbed. Self-blanching, rose-shaded ribs.
Pink Plume. Stalks tender, pale pink, delicate flavour.
Cole's Red Solid. Solid stems, tender, crisp.
Laing's Mammoth Red. Strong stalks of good quality; blanches well.

CULTURE. Sow for main crop in September and October, later sowing in December or January, and transplant into rich, well cultivated soil in trenches 18 inches wide and of like depth; stack soil on either side, to be ready for drawing back into the trenches as plants progress.

Leek
9d per oz.; 6d and 3d per packet.

Anderson's Perfection. Very handsome, blanches beautifully.
London Flag. Favourite with growers for market.
Musselburgh. If transplanted grows to immense size.

CULTURE. Sow in prepared beds in April, May, or June at the latest, and plant out in rows 18 inches apart and 8 inches in the rows. Hill up the plants as they advance, so as to blanch the neck.

Kohl-Rabi
1s per oz. 6d and 3d per pkt.

(TURNIP ROOTED CABBAGE)

A delicious vegetable when cooked in good condition

Large Green
Large Purple

CULTURE. Sow in beds like Cabbage, from December to March, and plant out in rows 18 inches apart.

Sweet or Table Corn
9d pt. (post free 1s), 6d and 3d per pkt.

A delicious vegetable. The cobs should be cooked when they are quite soft and tender like green peas.

Anderson's Table Queen. A superb variety, large cobs and white grains of extra quality.
The Metropolitan. Exceedingly white in colour during eatable condition.
Other fine varieties—**Early Cory, Triumph, Crosby's Early, Early Mammoth.**

CULTURE. Plant in September and October in rows 3 or 4 feet apart, and one foot in the rows. Succeeds in any moderately rich garden soil. Should be hoed and hilled when about a foot high.

Pop Corn
6d and 3d per packet.

Allow the cobs to ripen thoroughly, and then roast the grains in a close iron vessel until they "pop," shaking the vessel meantime. The "Pop Corn" is then taken out and dressed with flour sugar, when it forms a delicious sweet.

CULTURE. The same as Sweet Corn.

"Your Mammoth Salamander Lettuce is a most beautiful and best Summer Lettuce I have seen or grown, and your "Combination" Tomato I have grown with great success.—Chas. Day, Toowoomba, Q.– 8-2-05.

Ohio Lettuce

LETTUCE
1s oz.; 6d and 3d pkt.

CULTURE. With rich light soil and a supply of water these salad plants can be placed upon table daily throughout year. Sow from January to June, and transplant. June to January only sorts least liable to run to seed should be sown in drills where they are intended to remain. In planting out Lettuce they should be lifted without breaking the roots, and planted out during the dull and showery weather.

CABBAGE VARIETIES.

New York. Solid, crisp, tender, of excellent flavour.
Iceberg. Hard handsome heads, of exquisite flavour.
Deacon. One of the best; large heads. Stands summer.
Yellow Seeded Butter. One of best summer Lettuces.
Hanson. A remarkable solid hearting variety.
Tender and True. A splendid early crisp variety.
Ohio. Early, hardy, beautifully crisp; best summer sort.
Boston Curled. Extra curled leaves; globular shape, large.
Californian Butter. Inside leaves are rich cream yellow. Stands heat well.
Grand Rapids. Strong grower, keeps tender and crisp.
Tom Thumb. Small compact variety, of good quality.
Mignonette. Russet coloured; small, solid and compact
Mammoth Salamander. A wonderful heat-resister.
Neapolitan } The most popular varieties of Cabbage
Drumhead } Lettuce among Sydney market gardeners.

UPRIGHT or COS VARIETIES.

Paris Green Cos } Favourite sorts, will grow anywhere
Paris White Cos } in the State, if soil is rich and moist.

The leaves should be tied together to keep them crisp.

Endive
Winter Substitute for Lettuce.

1s per oz.; 6d and 3d per packet.

This salad plant when well grown and blanched is by some preferred to Lettuce.

Batavian Green Curled

CULTURE. Sow in February and March, and plant out when fit. Tie the leaves into a bunch surrounding the hearts, to blanch and keep them tender.

Culinary Herb Seeds
6d and 3d per packet.

Anise	Dandelion	Purslane
Balm	Dill	Rosemary
Basil (Bush)	Fennel	Rue
Basil (Sweet)	Hyssop	Sage
Borage	Lavender	Savory (Winter
Caraway	Marigold	Savory (Summer)
Chervil	Marjoram (Pot)	Sorrel
Coriander	Marjoram (Sweet)	Thyme

CULTURE. Sow seed in autumn and spring, in pans, boxes, or in a place where attention and water can be given.

Ornamental Gourds
6d and 3d per packet.

THIS curious family, the fruit of which is most fantastic in shape, the foliage is handsome, and the plants of rapid growth; highly ornamental climbers.

Mixed Gourds. All best sorts, including **Orange, Pear, Portmanteau, Club** and **Nest Egg.**
Nest Egg Gourd. Fruit size, shape, and colour of ordinary hen's egg. Can be used as Vegetable Marrow.
Dish Cloth Gourd (Loofa, or Vegetable Sponge). This Gourd has lovely dark green foliage; the fruit is about 2 feet in length, and the woody fibre lining of the inside of the fruit when ripe and properly dried is the dish cloth; most useful in the bath as a flesh rubber.

CULTURE. The same as Cucumber or Marrows.

Water Melons
OUR SEEDS are the best

9d per oz. 6d and 3d per packet.

CULTURE. Sow 5 or 6 seeds in prepared hills 5 or 6 feet apart each way, leaving only 2 of the best plants in each hill. The best time for sowing is September and October.

Cuban Queen. Large bright crimson-fleshed Melon, of superb quality and delicious flavour.
Mammoth Ironclad. Beautiful Melon; average weight of 50 lbs.; crisp, sugary flesh.
McIver Sugar. Fruit often 2 feet in length. Flesh pale pink, crisp and luscious.
The Dixie. Early variety; skin dark green, beautifully striped, fruit oblong.
Cole's Early. Bright red flesh, delicate flavour and very prolific.
Kolb's Gem. Light green skin, nearly round in shape; flesh bright red; rich and sweet.
Kleckley Sweets Rich bright scarlet flesh, crisp, sugary and melting.
Ice Cream. White seeded, excellent, with a delicious flavour.
American Champion. Thin rind, delicious flavour; same type as Cuban Queen.
Black Eyed Susan. Oblong in shape, bright red flesh, delicious flavour.
Black Spanish. Very juicy, good size and flavour.
Sugar. Red seeded variety, very luscious.
Seminole. Very productive, excellent quality.
Sweet Siberian. Suitable for the colder climates of the Commonwealth. Very distinct, of oval shape and medium size.

Egg Plant
6d and 3d per packet.

Improved New York Purple.
Long White China.

CULTURE. Sow in September, and plant out in rows 2 feet apart, and the same distance plant from plant. Thin the fruit and top the shoots to induce branching.

= Anderson & Co., Seedsmen and Plant Merchants, Sydney =

Preserving Melons 6d and 3d per packet.

Citron. Round, excellent for jam making.
Long Green. For jam or pie making.

CULTURE. Same as Water Melon.

Mango Melon or Vegetable Peach 1s per oz., 6d & 3d per pkt.

Fruit about the size of an orange and of delicate flavour when baked or boiled like a Vegetable Marrow.

Finest White Mustard

2s per lb.; 6d and 3d per packet.

CULTURE. As a salad, Mustard is usually cultivated in the same bed with Curled Cress.

Anderson's Silver Queen Onion

"Your Silver Skin Onions proved beauties last season."- J. P Hayes, *Rockdale, 1-5-05.*

Rock Melons 1s oz., 6d and 3d per pkt.

CULTURE. Sow in September and October. Hills not so wide apart as Water Melons, nor soil so highly manured. Water during dry weather. Not more than two strongest plants each hole; do not thin them out until they begin to run.

Perfected Delmonico. Orange-coloured flesh. Thickly netted, bright yellow when ripe.
Melrose. Flesh green, shading to salmon, outside rind dark green.
Early Hackensack. Early, delicious, thickly netted green skin, and green flesh.
Golden Perfection. Green flesh, excel. flavour.
Netted Gem. Light green flesh, melting, sweet.
The Banquet. Red fleshed medium, handsome.
Emerald Gem. Delicious, early, prolific, salmon colour flesh.
Skillman's Netted. Flesh deep green, sweet, and richly perfumed.
Improved Jenny Lind. Large and of fine quality, rich and highly flavoured.
Anne Arundel. Great size and quality, flesh solid, green, delicious flavour.
Large Yellow Cantaloupe. A fine large Melon, excellent flavour.
Pineapple. Green flesh, sweet, highly flavoured.
Large Persian. Large size, superior quality.
Nutmeg. Medium-sized Melon, delicious flavour.
Baltimore Fine, excellent flavour, green flesh.
Bay View. One of finest Cantaloupe Melons.
Sweet Home. Flesh very thick, light green; sweet and luscious in flavour.

Mushroom Spawn

6d per brick (post free 1s 3d); or Two Bricks post free for 2s 3d.

English. Procured from the most reliable source.

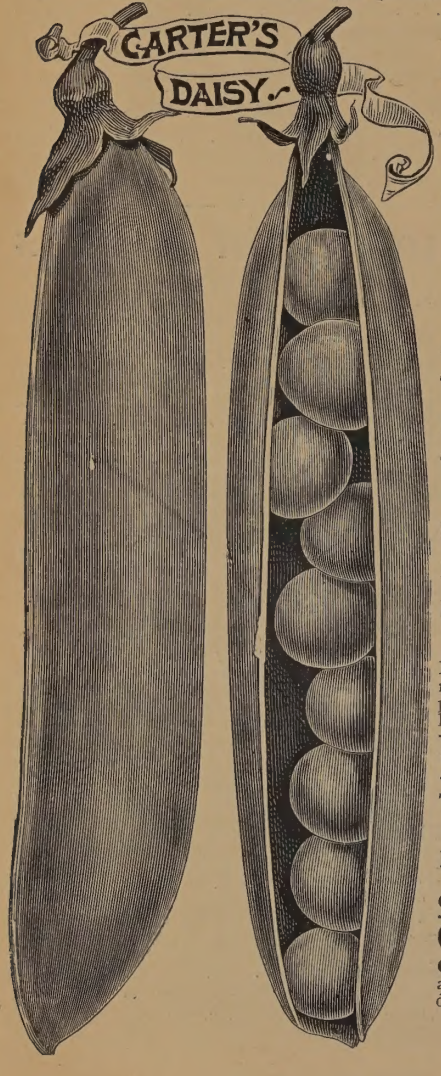
Onion 9d per oz. 6d and 3d per packet.

CULTURE. Sow March or April, transplanting during the following July and August into drills 2 feet apart and 10 inches in the drill. A second sowing can be made in June or July, in drills, to be thinned out. Loamy land is best for Onions.

Anderson's Market Model. Colour brown, large and early; good keeper.
Anderson's Mammoth Silver King. Mild and pleasant flavour.
Brown Spanish. A splendid variety, brown skin; good keeper, solid.
Brown Globe. Like above: all its good qualities.
Extra Early Yellow Globe. Very early; excellent domestic variety.
Extra Early Flat Red. Very early, mild flavour
Hunter River Brown. A very early strain of Brown Spanish Onion; not a good keeper. **1/6 oz.**
Silver Queen. A good early white skinned.
Spanish Globe. Exceedingly mild and sweet. In packets only at **6d** and **3d** each.
James' Keeping. One of the best; resembles Brown Globe.
Giant Rocca. Large bulb; reddish yellow colour.
Anderson's White Pickling Onion "Champion." Small, mild flavour; early.
Silver Skin. Excellent pickling variety, with clean silver skin.
The Queen. Silver-skinned pickling variety, fine flavour, early.
Potato Onion Seed. For Sets see page 5. **3d** and **6d** per packet.

Peas 1s quart (post free 1s 6d) 6d and 3d per packet

Special Quotations to Market Gardeners and Large Growers for all varieties, see page 6.



EARLY VARIETIES.

Blue Peter. Excellent early dwarf.
Gradus. One of the leading sorts.
The Daisy. Height 12 to 18 inches. Covered with pods 5 inches in length.
McLean's Little Gem. An abundant bearer, pods well filled.
American Wonder. Very early Dwarf Pea, pods well filled.
Wm. Hurst. Large well-filled pods of fine flavour.

MEDIUM VARIETIES.

Yorkshire Hero. Highly esteemed Wrinkled Pea.
Veitch's Perfection. Not quite so hardy as the Yorkshire Hero.
Stratagem. Pods large and fine; deliciously flavoured.
Telephone. Grows 4 feet high, a very strong grower.
Duke of Albany. A Pea of unusual merit.
The Queen. Large pods, 10 to 12 peas in each, most delicious flavour.

LATE VARIETIES.

Bedman's Blue Imperial. Heavy bearer.
Pride of the Market. Superior round Marrow.
Improved Telegraph. Great bearer, excellent quality.

CULTURE. Sow for a large crop May, June and July, but an early sowing may be made in March, and successive planting during winter and spring. Strong loamy soil, if somewhat sandy the better.

Sugar Peas EDIBLE PODDED

Tall, Grey Seeded. The pods are cooked whole while young. **2s** per qt (**2s 6d** post free), **6d** and **3d** per pkt
Dwarf. A dwarf growing variety of Sugar Pea. **6d** and **3d** per packet.
CULTURE. Same as ordinary varieties.

OKRA Impr. Dwarf, Long Green. 6d and 3d per packet.

CULTURE. Sow September, October and November successively. Good garden soil will suit. Plants 2 feet apart.

Parsnip 6d per oz., 6d and 3d per packet.

Hollow Crown, Large Guernsey

CULTURE. Sow sparingly during February, March and April, and again in August, September and October for full crop. Land must be well and deeply worked. Freshly manured land is not suitable. Rows should be 2 feet apart, and the plants should be thinned to 8 or 10 inches.

Parsley 6d per oz., 6d and 3d per packet.

Extra Triple Curled. Fine garnishing, one of the best.
Champion Moss. Dwarf-growing sort.
Fern Leaved. Ornamental, strong flavour.
Verdant Beauty. Curly, ornamental.

CULTURE. Sow in March, and again in August or September and October. Soil should be finely worked, seed in drills and lightly covered. Thin to about 18 in. apart.

PE-TSAI CHINESE CABBAGE 6d and 3d per pkt.

CULTURE. Will succeed in dry seasons where other varieties of Cabbage do not. Sow during the autumn and spring.

PEPPER or Capsicum 6d & 3d per pkt.

Celestial. Very ornamental.
Elephant's Trunk. Very large, and of eccentric shape.
Bird's Eye. Highly prized for hot pickles.
Coral Gem Bouquet. Plants covered with very small peppers.
Ruby King. Handsome large scarlet fruits.
Long Red Cayenne **Cherry**
Long Yellow Cayenne **Small Chili**
Sweet Spanish **Golden Dawn**

CULTURE. Sow in seed bed in September or October, plant out when plants are 3 inches high—2 or 3 feet apart. The soil can hardly be too rich.

Radish 6d per oz. 6d and 3d per pkt.

Long Scarlet. Bright colour, crisp, tender.
Mixed Turnip. Mixture of red and white.
Chartier. Bright crimson colour, crisp.
Long Cardinal. Crimson, tipped white.
French Breakfast. Red, tipped white.
Black Spanish. Very large.
Scarlet Olived-Shaped. A delicious variety, white flesh.
Red Turnip. Crimson skin, white flesh, tender, crisp.
White Turnip. Skin and flesh pure white.
Celestial or White Chinese. Flesh, firm, solid white.

CULTURE. Sow in light, rich sandy soil. A mulching of manure on surface and water freely during the summer months.

Rhubarb 1s 6d per oz. 6d and 3d per pkt.

Giant **Mitchell's Albert**
Crimson Winter **Myatt's Lynnæus**

For Roots of all see page 5.

CULTURE. Sow under shelter of a few dry leafless boughs, and a manure mulch in August or September. Keep young plants growing freely. Transplant in autumn into permanent beds of rich soil, with plenty of manure—3 to 4 feet apart.

Rosella 6d and 3d per packet.

CULTURE. Requires hot climate, should be suitable for warm, sheltered situations near Sydney, and on our coast. Raise in artificial heat in June or July, keep in pots till end of September, when they may be planted out in rows 4 feet apart.

Salsify (Vegetable Oyster) 1s oz.; 6d and 3d pkt.

CULTURE. Roots are used like Carrots or Parsnips; can be cultivated similarly.

Pumpkin

CULTURE. Heavily manure the land all over and dig in deeply. The hills should be six or eight feet apart, and only two plants should be allowed to remain in each. Sow six or eight seeds in each hill. Sow August to November.

FOR TABLE USE. 9d per oz.; 6d and 3d per packet.

Crown. Medium size, good keeper.
Large Button. Dry sort, fine keeper.
Ironbark, True. Thick flesh, good flavour, excellent keeper.
Calhoun. Salmon coloured.
Japanese. Flesh rich salmon, fine grain.
Jonathan. Large bottle-shaped fruit, with crooked neck.
Turk's Cap. A fine table variety, and a good keeper.
Gramma. Useful sort, both for cooking in various ways and for cattle or pig feed.

Anderson & Co., Seedsmen and Plant Merchants, Sydney

Spinach
6d per oz.
6d and **3d** per packet.

Round and Prickly. Two well-known varieties.
Monstrous Viroflay. A very large fine sort.

CULTURE. Sow in rows about 18 inches apart, and thin out to about 9 inches.

Improved Seakale
1s per oz.; **6d** and **3d** per pkt.

CULTURE. Raise in seed beds and when yearlings transfer plants to permanent beds, and plant from 2 to 2½ feet apart each way.

Turnip
6d per oz.
6d and **3d** per packet.

Anderson's White Model. Clear white skin, grand quality.
White Stone. White flesh, oval shaped.
White Nepaul. Early short-topped, flat shape.
Early Red American Stone. Like the above, with a purple top.
Green-top Stone. A most esteemed variety.
Red-top Munich. Extra early, fine flavour.
Long White. Suitable for hot districts.
Orange Jelly. Yellow-fleshed.
Scarlet Kashmyr. Skin scarlet, flesh clear white.
Garden Swede (Laing's). A favourite Turnip.

CULTURE. A good light soil suits Turnips best. Sow in February and March in drills 18 inches apart, and thin out to 6 or 8 inches. Also in November.

Squash
6d and **3d** per packet.

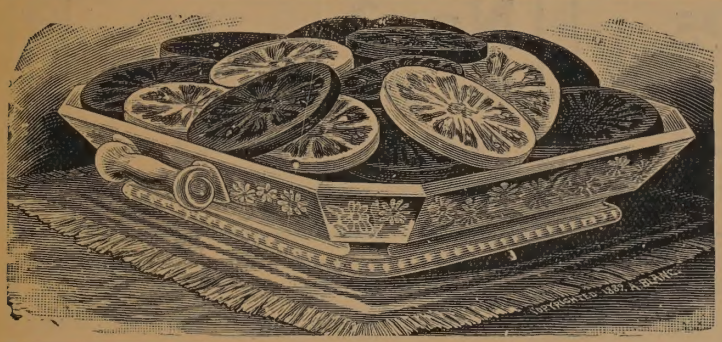
Early White Custard. Delicate flavour, compact growth.
Early Golden Bush. Yellow skin.
Improved Hubbard. One of the most reliable.
Forahook. Flesh dry and sweet, delightful flavour.
Delicata. One of the earliest of the running varieties.
Marblehead (Runner) **White Pineapple** (R.)
Crookneck (Bush) **Perfect Gem** (R.)
Boston Marrow (Runner) Good serviceable varieties.

CULTURE. Sow in August, September, October, and November. Prepare beds as for Pumpkins. Plant seeds 2 feet and the rows about 4 feet apart, for the bush kinds. Running kinds at the same distances as Pumpkins.

Vegetable Marrow
9d per oz.; **6d** and **3d** per packet.

Anderson's Select Long Early White. Excellent running variety.
Long Fruited Bush (White). Very early, does not run.
Long Fruited Bush (Green). Equal merit green-fruiting.
Moore's Vegetable Cream. Fruit of medinm size.
Custard Shaped. Fine flavour.
Rice Marrow. Delicious, flesh separating like grains of rice when cooked.

CULTURE. Cultivated and used in the same way as recommended for Squash.



"I got Tomato seed from you last year; Mr. Nicolas and I had great success with them—we have the best name about the district. I had any quantity go 1½ and 1 lb. I put out 3000 plants; I have already taken off 450 gin cases, so if you continue to supply me with all Seeds, I can do a good thing with you."—D. W. MARSHALL, *Forbes.*—25-2-05.

Tomato
6d and **3d** per packet

Combination. Fruit scarlet, large, smooth. solid and free from cracks.
Mikado. Purplish red; produced in clusters.
Ponderosa. A splendid large red variety, sometimes 1½lbs. in weight.
Optimus. Superior red, uniform size, large and handsome.
Duke of York. Scarlet, smooth, round, in shape, flesh very firm.
Matchless. Bright cardinal red colour, entirely without core.
Large Red Smooth. Large, smooth, solid, firm fruit; superior quality.
Trophy. Fine hardy sort, smooth, solid.
Early Red Ruby. Heavy bearer.
Dwarf Champion. A beautiful Tomato, medium size, solid, prolific.
Dwarf Champion, Golden. Fruits a beautiful colour, of fine flavour.

CULTURE. Sow under glass in July, and in open during September, October and November, and plant out as soon as ready into good strong rich soil.

Crimson Cushion. Large, flesh solid.
Peach. A deep orange rose colour.
King Humbert. Resembling a huge oblong Plum.
Golden Trophy. Medium sized, delicate flavour.
Fordhook Fancy. Erect growth, bears enormous crops.
Beauty (Livingstone). Medium size, purplish crimson.
Perfection. Excellent market sort, clear bright scarlet.
Sparks' Earliana. This exceedingly early Tomato is a large fruit of bright red, and very solid.

Also the following well-known sorts:—
Yellow Cherry **Yellow Plum**
Scarlet Pear Shaped **Red Cherry**

Culinary Plants | Roots & Bulbs

ASPARAGUS PLANTS.
Can be supplied during June, July, August.
Colossal ... ... **7s 6d** per 100
Perfection ... ... **7s 6d** per 100
Erfurt Giant ... ... **7s 6d** per 100
Camden Park Strain **7s 6d** per 100

ARTICHOKES.
Can be supplied from May to July.
Globe, green and purple, plants **6s** per doz.
Jerusalem, tubers ... ... **3d** per lb.
,, **White,** tubers ... **3d** per lb.

HORSERADISH
Can be supplied any time during the year.
Roots or Crowns .. .. **3s** per doz.

SEAKALE
Can be supplied any time during the winter months.
Plants, two years old ... ... **6s** per doz.

Plants—Of the following may be sent by post at an additional cost of **6d** to **9d** per **100**, according to size of plants.

BROCCOLI
Can be supplied from January to May.
Price ... ... **1s 6d** per 100

BRUSSELS SPROUTS
Can be supplied from January to May.
Price ... ... **1s 6d** per 100

CAULIFLOWER
Can be supplied from January to June.
Veitch's Autumn Giant ... **1s 6d** per 100
Early London .. ... **1s 6d** per 100
Asiatic ... ... **1s 6d** per 100

CABBAGE
Can be supplied from January to December.
St. John's Day ... ... **1s** per 100
Succession ... ... **1s** per 100
Red Cabbage ... ... **1s 6d** per 100

For St. John's Day and Succession special prices can be quoted per 1000 or 10,000 lots.

East Ham, **London Market**, **Early York** (And other sorts) **1s** per 100

Drumhead Savoys ... **1s 6d** per 100

A splendid Cabbage for cold districts; can be supplied January to May.

CELERY
From January to July is best time to plant.
Red and White ... ... **2s** per 100

LETTUCE
Can be supplied any time during the year.
Price ... ... **1s** per 100

TOMATO
Can be supplied July till December.
Strong and well grown from the open ground. **6d** per dozen, **3s 6d** per 100; additional cost by post of **2d** per dozen, **9d** per 100.
In September and October special quotations per **1000** lots.

Early Ruby **Crimson Cushion**
Duke of York **Dwarf Champion**
Fordhook Fancy **Mikado**
Trophy **Optimus**
Ponderosa **Golden Trophy**

And other varieties.

CHIVES
For Salads, etc. **6d** per clump.

RHUBARB ROOTS
Can be supplied from May to end October.
Market Varieties **6d** each **4s** per doz.
The Giant **6d** each **5s** per doz.
Hogan's Shillelagh **9d** each **7s 6d** doz.
Crimson Winter **6d** each **5s** per doz.

ESCHALOTS
6d per lb., post free **1s 3d.**

POTATO ONIONS
4d per lb., post free **1s.**

TREE or TOP ONIONS
9d per lb., post free **1s 6d.**

CHOKOS
These can be supplied during August.
Price ... ... **3d** each, postage extra

GARLIC
6d per lb., post free **1s 3d.**

SWEET POTATO Cuttings
Yellow Jersey ... ... **9d** doz. **4s** 100
White Maltese ... ... **9d** doz. **4s** 100

These are the two best varieties and are very prolific and good flavour. We can supply strong rooted cuttings November, December, January.

HERBS
Sage ... . **3d** each
Thyme ... ... **3d** each
Marjoram ... ... **3d** each
Mint Roots **3d** and **6d** per bundle

Beans and Peas
for Cooking

Blue Peas ... ... **8d** qt. **10s** bus.
White Haricot Beans **9d** qt. **15s** bus.
Grey or German Lentils ... **6d** lb.
Egyptian or Red Lentils ... **5d** lb.

Special Quotation to the Trade and to Storekeepers.

And all these Seeds are sold subject to Terms of Sale, and are all post or carriage free, excepting Peas and Beans.

Our Seeds are always the Best

Terms of Sale. Messrs. Anderson and Co., while using every care in the selection of all goods supplied, give no warranty, expressed or implied, as to the description, quality, productiveness, or any other matter of any seeds, bulbs or roots they send out, and they will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.

Our Seeds are always the Best

Anderson's Kitchen Garden Calendar

For JANUARY

Sow full crop of French Beans, Butter Beans, Swede Turnip, and Spinach, also Cabbage and Cauliflower, in the seed beds, and Celery in boxes.

Small sowing also of Cucumber, Bush Squash, Radish, Cress, Parsley, Onion, Carrot, Leek, Sweet Corn, and Peas, also Lettuce broadcast, in a moist place (to be thinned out but not transplanted), and Broccoli, Brussels Sprouts, Borecole, in seed beds. Plant out Cabbage and Cauliflower, also Celery in prepared trenches.

For FEBRUARY

Sow full crop of Swede Turnip, White Turnip, Cabbage, Savoy.

Make a small sowing of Celery, Leek, Carrot, Onion, Spinach, Broccoli, Brussels Sprouts, Cauliflower, Peas, French Beans, Butter Beans, Parsnip, Beet, Mustard and Cress, Radish, Lettuce in moist soil, not to be transplanted. Plant out during favourable weather, Cauliflower, Cabbage, and Celery Plants, also Garlic and Eschalot Bulbs, and Early Rose or Kidney Potatoes.

For MARCH

Sow full crop of Cabbage, Radish, White Turnip, Spinach, Lettuce, Onion, Peas, Broad Beans, Parsley, and Water Cress.

Also a small sowing of Beet, Carrot, Endive, Parsnip, French Beans (last sowing), and Mustard and Cress.

Plant out Cauliflower, Cabbage, Leek, Celery, and Brussels Sprouts; also Eschalots and Tree Onion Bulbs and Early Rose Potatoes.

For APRIL

Herbs may be taken up, divided, and replanted, also winter Rhubarb, if young plants are not to be had from the seed bed, which are to be preferred.

Sow full crop of Peas, Broad Beans, White Turnip, Onion, Leek, Lettuce, Radish, Herb Seeds.

Also smaller sowing of Spinach, Broccoli, Carrot, Parsnip, Mustard and Cress, and Water Cress.

Plant out Cabbage and Celery Plants, plant Garlic and Eschalots and Tree Onion Bulbs, also a few Early Rose Potatoes, if good sets are obtainable; main planting to be made in June. Crimson Winter Rhubarb Roots can also be planted.

For MAY

Sow full crop of Peas, Broad Beans, Radish, Leek, and Cabbage.

Smaller sowing of Lettuce, Mustard and Cress, Onion, Turnip, and Spinach.

Plant Garlic, Eschalots, Potato, Onions, and Tree Onion Bulbs, Asparagus Roots, Winter Rhubarb, Horse Radish, Herb Roots, and Celery Plants in trenches.

New Asparagus beds may now be formed and old ones topdressed and otherwise attended to.

For JUNE

Sow full crop of Peas, Broad Beans, Cabbage, Cauliflower, Brussels Sprouts, and Broccoli.

Smaller sowing of Lettuce, Radish, Carrot, Leek, White Turnip, Spinach, Borecole.

Plant out Winter Rhubarb, Asparagus and Horse Radish Roots, Herbs, Eschalots, Garlic, Potato and Tree Onions, Jerusalem Artichokes, Cabbage and Cauliflower Plants.

For JULY

Sow full crop of Peas, Broad Beans (last full sowing near the coast), Lettuce, Carrot, Beet, Rhubarb, Onion.

A smaller sowing of Cabbage, Parsley, Asparagus, Broccoli, Peas, Radish, Leeks (a full planting in rich soil), Cucumber, Tomatos and Melons (under glass).

Transplant Onions, and plant out Herbs. Make new beds of Asparagus, Horse Radish, and Rhubarb Roots, also Eschalots, Garlic, Tree and Potato Onions, and make a general planting of Potatoes. (See our special list.)

For AUGUST

Sow full crop of Onion, Leek, Parsnip, Beet, Carrot, Tomato, Lettuce, Squash, Cucumber, Melons, Peas, Pumpkin, French Beans, Butter Beans, Swede and White Turnip, Radish, Spinach, Capsicum or Chilies, Parsley, Broccoli, Egg Plant, Rhubarb, Asparagus, Cabbage, Brussels Sprouts, Vegetable Marrow, Cape Gooseberry, and Herbs.

Plant out Jerusalem Artichokes, Rhubarb and Asparagus Roots, Eschalots, Garlic and Tree Onions, Eary Rose and other Potatoes. A few Sweet Potatoes may be planted in a light open compost (a mixture of bush scrapings and wood ashes being excellent for the purpose) to produce sets for planting out towards the end of next month.

For SEPTEMBER

Sow a full crop of French Beans (dwarf and tall vars.), Butter Beans, Leek, Spinach, Cucumber, Sweet Corn, Celery, Cape Gooseberry, Capsicum, Rhubarb, Egg Plant, Pumpkin, Vegetable Marrow, Squash, and Tomato

A smaller sowing of Peas, Turnip, Beet, Lettuce, Radish, Carrot, Parsnip, Onion, Swede Turnip, Parsley, Rock and Preserving Melon.

Plant out Tomatoes into good rich soil, and protect them until established. Choco Tubers may be planted towards the end of this month.

For OCTOBER

Sow full crop of French Beans (dwarf and tall), Butter Beans, Sweet Corn, Pumpkin, Melon (Water and Rock), Cucumber, Vegetable Marrow, Squash, and Celery.

A small sowing of Peas, Cabbage, Leek, Radish, Lettuce, Carrot, Parsnip, Onion, Turnip, Tomato, Spinach, Beet, Parsley, Capsicum.

Lima Beans (tall and dwarf varieties), a small early sowing towards end of the month.

Continue to plant out Tomatoes for succession.

For NOVEMBER

Sow a full crop of French Beans, Butter Beans, Lima Beans (tall and dwarf),

And smaller sowings of Squash, Cucumber, Lettuce, Radish, Beet, Celery, Melon and Pumpkin. Plant out Tomatoes.

For DECEMBER

Sow full crop of Cauliflower in seed bed, Cabbage, French Beans, Butter Beans, and Tall Lima Beans.

Also smaller sowings of Beet, Brussels Sprouts, Carrot, Cucumber, Squash and Vegetable Marrow, Radish, Turnip (White and Swede), Lettuce, and Mustard and Cress.

Plant Eschalots and Tree Onions.

Mulch your Cucumber, Tomato, and Melon Plants this month.

A Few Hints on Vegetable Culture

Suitable Land.—Rich, strong, virgin loam, or a rich sandy loam of good depth, is best for vegetable production, but for summer crops rich, peaty, black soil gives wonderful results. If the only land available is naturally poor it can be gradually brought into condition by trenching or digging it over deeply, and enriching it with plenty of manure and vegetable matter. Even sand will grow vegetables, but it should have plenty of manure, a good dressing of black soil if available, and rotted vegetable matter if procurable. Stiff soils should have sand and manure added to them. Such land should be roughly broken up during summer, and allowed to lie without a crop for some months.

A Seed Bed—Sowing and Transplanting.—Every garden should have a seed bed, where a stock of young plants can be raised. Select good light soil, if possible, and see it is well drained. The soil should then be well and deeply dug over, and old stable manure thoroughly mixed with it; then level the surface. The seed can then be sown, and a light covering of soil given. Half-an-inch is quite sufficient for cabbage, cauliflower, tomato, and such sized seeds, and only a slight increase for larger seeds. Mulch the surface lightly with old stable manure, broken up fine; it will keep the roots cool, and promote the young growth. Water every evening during dry, hot weather. Cabbage, cauliflower, broccoli, Brussel's sprouts, leek, parsley, tomato, capsicum should all be raised in a seed bed. When transplanting, lift the plants carefully with a trowel, and put out in the manner directed in cultural directions given under the list of each vegetable in this catalogue. A good watering is necessary to complete the operation.

Sowing and Thinning in Open Ground.—Sow just before or after rain, if possible. Before sowing a crop always dig over the soil, thoroughly manure it, if required, and then reduce it to a fine tilth. Always sow in rows in preference to broadcast, as the former method has many advantages. Avoid deep sowing; a slight covering is enough for small seeds. Half-an-inch covering for turnip, lettuce, onion, radish, and such seed is quite enough; for beet one inch, and for peas about two inches.

Manuring.—Most vegetables are strong feeders, and it is necessary that the land should be kept up to a high state of fertility by using plenty of manure. Horse manure is excellent for vegetable crops, provided it is not perished by being exposed to the action of the atmosphere, which speedily extracts all the ammonia and other good properties. The best is that which is taken from the stable and placed in a heap or pit daily. Artificial manures, such as bonedust, superphosphate, blood manure, are all excellent fertilisers, and if properly applied and selected for the requirements of the soil and the vegetables to be grown, they will always prove a profitable investment.

The Flower Garden Calendar

CLASSIFICATION OF FLOWER SEEDS AS BELOW MARKED:
"A" after the name indicates Annual Plants. "B" indicates Biennial Plants. "P" indicates Perennial Plants

Sow in Spring Aug., Sept. and Oct.	Amaranthus, A. (October) Aster, A. Antirrhinum, B. Aquilegia, P. Calliopsis, A. Candytuft, A. Carnation, P. Carnation, Marguerite, B. Clianthus, Dampierii, A. Convolvulus, A.	Cornflower, A. Cosmos, A. Dianthus, A. Digitalis, B. Eschscholtzia, A. Forget-me-not, P. Gaillardia, A. Godetia, A. Helichrysum, A. Larkspur, A.	Lobelia, A. Lupinus, A. Linum, A. Mignonette, A. Maurandya, P (Creeper) Mimulus, P. Nasturtium, A. Nemophila, A. Pansy, B. Petunia, P.	Poppy, A. Portulacca, A. (October) Phlox Drummondi, A. Rhodanthe, A. Salpiglossis, A. Scabiosa, A. Sweet Pea, A. Sunflower, A. Zinnia, A. (October)
Sow in Summer Nov., Dec. and Jan.	Amaranthus, A. Balsam, A. Calliopsis, A. Celosia, A. Clianthus, Dampierii, A.	Coreopsis, A and P. Cosmos, A. Marigold, A. Mesembryanthemum, A. Portulacca, A.	Petunia, P. Pansy, B. (January) Pyrethrum, B. Phlox Drummondi, A.	Ricinus, B. Scabiosa, A. Sunflower, A. Zinnia, A.
Sow in Autumn Feb., March and April	Aster, A. Antirrhinum, B. Aquilegia, P. Anemone, A. Calliopsis, A. Candytuft, A. Carnation, P. Carnation, Marguerite, B. Campanula, P. Chrysanthemum, Annual, B. Convolvulus, A. Cornflower, A. Cosmos, A.	Cowslip, P. Daisy, P. Delphinium, P. Dianthus, A. Digitalis, B. Eschscholtzia, A. Forget-me-not, P. Gaillardia, A and P. Godetia, A. Helicrysum, A. Larkspur, A. Lobelia, A. Lupinus, A.	Linum, A. Mignonette, A. Maurandya, P. (Creeper) Mimulus, P. Nasturtium, A. Nemophila, A. Pansy, B. Pentstemon, P. Polyanthus, P. Primrose, P. Petunia, P. Portulacca, A.	Poppy, A. Phlox Drummondi, A. Rhodanthe, A. Salpiglossis, A. Scabiosa, A. Stocks, A. Sweet Pea, A. Sunflower, A. Violet, P. Wallflower, P. Zinnia, A. Stocks, B.
Sow in Winter May, June and July	Antirrhinum, B. Aquilegia, P. Calliopsis, A. Campanula, P. Candytuft, A. Centaurea, A. Convolvulus, A.	Coreopsis, A. and P. Cosmos, A. Daisy, P. Dianthus, A. Eschscholtzia, A. Forget-me-not, B. Godetia, A.	Larkspur, A. Linaria, A. Linum, A. Lupinus, A. Marguerite Carnation, B. Mignonette, A. Nasturtium, A.	Nemophila, A. Pansy, B. Phlox Drummondi, A. Rhodanthe, A. Sweet Pea, A. Stocks (Intermediate and Brompton), B.

Practical Hints on the Culture of Flowers from Seed

The Soil should be thoroughly well dug over to a depth of 12 to 18 inches, and the top soil worked into a fine tilth. Before sowing, a good dressing of old stable manure or other suitable fertiliser should be dug in. Keep the soil well stirred, so as to allow the air to penetrate freely and sweeten it. The surface should never be allowed to become hard.

Sowing.—Nearly all flower seeds are very small, and they must be sown very near the surface, with only a slight sprinkling of soil over them. When the soil has been prepared, level it with the rake, and sow the seed over the surface in rows or patches as desired, but not too thick. Cover very lightly, water carefully and the operation is completed.

In Transplanting, seedlings should be lifted from the seed-bed with a trowel, and the best rooted seedlings, with plenty of small fibrous roots, selected. Open a space sufficiently large to accommodate the plants, and carefully place them into it, filling in the soil around them and making firm.

Thinning Out.—It is often necessary to thin out the plants. Do this when in the second or third leaf; transplant surplus if necessary, but do not allow the plants which remain to stand too close.

Feed Your Plants Well.—Old stable or cow manure can be used to advantage, but artificial fertilisers, such as blood or bone manure, superphosphates, and the many "special" garden manures we offer, if used in small quantities, will give wonderful results.

Mulching and Watering.—A topdressing of old stable manure around the plants will prolong their blooming season. During the heat of summer water thoroughly. One good soaking weekly is worth a dozen sprinklings.

Sow Often for Continuous Blooming.—By making frequent sowings at intervals, you can have in perfection the bloom of any annual during the entire length of its flowering season. In that way you secure a succession of flowers throughout the year.

Keep the Garden Bright with Flowers.—As soon as annual plants are past their best, pull them up; they never recover after they have bloomed freely and gone off; remove all dead flowers, leaves and seed pods, and you will prolong the blooming season of the plants and give a freshness to their appearance.

The Useful Shade & Shelter Frame—And How to Make It

A FEW boards or battens to form the sides and ends, and some canvas or calico to make the covering, are all that is required to provide a shelter frame.

It can be made of any required size, and should occupy a sheltered position, but where the plants will get the benefit of the morning sun. The timber forming it need not be more than six inches above the surface, but the top of the battens should be perfectly level. The canvas or calico forming the covering should be tacked on to a frame of hardwood, which will fit over the bed enclosed, and should be so fixed that it will not be liable to be blown off in windy weather.

The soil in the frame should be rich, well-worked, and have plenty of old stable manure incorporated with it. The seeds should be sown on the surface, in rows three to four inches apart, and divided by battens so as to avoid mixing; a light mulching of manure, rubbed fine, will complete the operation of sowing and help germination.

The cover to the shade frame should always be removed in the evening and during dull, cool weather, to prevent the plants becoming drawn. Such plants as Asters, Pansies, Salpiglossis, Antirrhinums, Phlox Drummondii, or in fact any annuals or biennials which can be transplanted, raised in this way will give splendid results. Such a frame as we have described will always be useful in a garden, and it can be made any size.

The special advantage of a canvas frame is that seeds can be sown in it during the hottest and dryest weather, and a fine stock of young plants can be secured, which can be transplanted into the garden as soon as a favourable opportunity occurs, and the seed can always be sown at the proper season.

General List of Flower Seeds

When ordering Flower Seeds make use of Numbers opposite each variety, AND GIVE DATE OF CATALOGUE

Abronia — 3d per pkt.

1 **Umbellata.** Rosy lilac, fragrant.
2 **Villosa.** Dark red.
Trailing plants, suitable for rockery; hardy annual. Sow in spring and autumn. 6 inches.

Acroclinium — 3d per pkt.

5 **Album, Single.** Graceful white, with yellow centre.
6 **Roseum, Single.** Rose, dark eye.
7 **Roseum, Double.** Pretty bright rose, with yellow centre.
Beautiful everlasting; can be dried for winter bouquets; hardy annual. Sow in autumn or spring. 12 inches.

Adonis — 3d per pkt.

10 **Vernalis.** Perennial. Star-shaped yellow flowers.
11 **Æstivalis** (FLOS ADONIS). Annual. Crimson scarlet.
Free flowering; feathery foliage; very showy. Sow in spring. 12 inches.

Alonsoa (Mask Flower) — 3d per pkt.

14 **Warscewiczii.** Brilliant scarlet.
15 **Albiflora.** White; very constant.
Very showy, half-hardy annual, with bright scarlet and white flowers. Sow autumn or spring. 12 inches.

Alyssum — 3d per pkt.

17 **Maritimum** (SWEET ALYSSUM) Hardy annual.
18 **Maritimum Compactum** (LITTE GEM). Very dwarf, erect variety.
19 **Saxatile.** Dwarf, showy hardy perennial; yellow flowers. Leaves hoary margined. Sow autumn or spring.

Amaranthus — 3d per pkt.

22 **Salicifolius** (FOUNTAIN PLANT). Crimson and yellow plume. 4 to 5 feet.
23 **Tricolour** (JOSEPH'S COAT). Leaves red, yellow and green. 3 feet.
24 **Henderii.** Leaves carmine, orange yellow and green. 4 feet.
25 **Firebrand.** Large leaves, deep blood red, with bright yellow edges. 6 feet.
26 **Queen Victoria.** Purple brown foliage.
27 **Caudatus** (LOVE-LIES-BLEEDING). Racemes of drooping purplish-crimson flowers. 3 feet.
Magnificent foliage plants of tropical appearance, with gorgeous leaves of crimson and gold, and green and yellow; colours deepen in the autumn. Salicifolius is a most lovely variety, but Tricolour is also a gem; hardy annuals. Sow September, October, November, December

Ammobium — 3d per pkt.

32 **Alatum.** White, with golden centre. 18 inches. Hardy everlasting, small flowers; annual. Sow in spring.

Anagallis (Pimpernel) — 3d per pkt.

35 **Grandiflora.** Choice mixed.
36 **Grandiflora Cœrulea.** Blue, very fine.
Dwarf-growing annuals.

Anchusa — 3d per pkt.

40 **Argustifolia.** True deep blue.
41 **Capensis.** Bright azure blue.
Hardy perennial. Sow autumn and spring.

Aquilegia

Our Packet Seeds are all Post Free

Anemone — 6d per pkt.

45 **Japonica.** Very pretty; flowers all summer; purplish red. 24 inches.
46 **Coronaria.** Mixed; various colours. 12 inches.
47 **St. Brigid.** Large, single and semi-double flowers.
Tuberous rooted plant, easily produced from seed. Sow early, autumn. **See Bulb List for Tubers of Anemones.**

Angelonia — 6d per pkt.

50 **Grandiflora Alba.** Handsome upright growing plant, producing spikes covered with pure white flowers. Sow in spring.

Antirrhinum (Snapdragon) — 3d per pkt.

52 **Anderson & Co.'s Extra Choice.** Distinct, beautiful.
53 **Brilliant.** Scarlet, golden and white.
54 **Delila.** Carmine, white throat.
55 **Galathee.** Very fine crimson
56 **Picturatum.** Showy, striped, spotted.

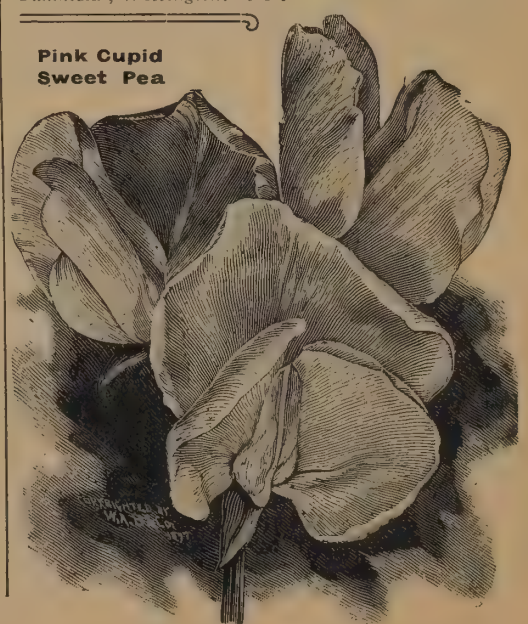
"I might mention that I have taken the First Prize for collection of Sweet Peas two consecutive years at Wellington, judged by Mr. Ferguson, of the Royal Nurseries, Sydney, and in his opinion they were the finest collection of Sweet Peas he ever saw in or out of Sydney. I bought the seed from your people two years ago."—H. H. A. FLANAGAN, *Wellington.—8-3-05*



Flower Seeds—General List—*(continued)*

Love-lies-bleeding (See Amaranthus)

Lupins (Large) 3d per pkt.

690 **Blue.** A nice bright colour
691 **Rose.** Light rosy red.
692 **White.** Bright pure white.
693 **Yellow.** This variety is fragrant.
Handsome spikes of flowers. Sow autumn and spring.

Lupinus 3d per pkt.

694 **Hartwegii.** Very pretty blue.
695 **Dunnettii Superbus.** Purple, yellow, white.
696 **Cruickshankii.** Fine deep blue.
697 **Nanus.** Pretty dwarf blue variety. 6 inches.
All hardy annuals. Sow autumn and spring.
698 **Polyphyllus Albus.** Long spikes; white.
699 **Polyphyllus Atrocoeruleus.** Blue.
700 **Polyphyllus Douglasi Superbus.** Rich purple.
701 **Polyphyllus Mixed.**
Perennial strain, producing superb spikes of flowers.

Mignonette Machet

Lychnis (Chinese Catchfly) 3d per pkt.

706 **Chalcedonica.** Scarlet flower in trusses.
Perennial. 2 feet. Sow autumn and spring.

Mandevillea 6d per pkt.

709 **Suaveolens.** White fragrant frowers. Perennial climber 20 feet.

Marguerites (See Crysanthemum)

Martynia 3d per pkt.

711 **Fragrans.** Crimson purple flowers.
Sweet-scented annual. 2 feet. Sow in spring.

Marigold (Tagetes) 3d per pkt.

(See also Calendula)

712 **French Dwarf.** Finest mixed; var. 18 in.
713 **French Yellow.** Double sulphur yellow. 18 in.
714 **African Lemon.** Lemon colour. 2½ feet.
715 **African Orange.** Orange; tall. 2½ feet.
Hardy, constant bloomers. Annuals. Sow spring and summer.

Mathiola (Evening Scented Stock) 3d pkt.

720 **Bicornis.** Pink and lilac flowers, which open in the evening.
Hardy annual. Sow in spring. 18 inches.

Matricaria 3d per pkt.

722 **Eximia fl. pl.** White double flowers.
Hardy annual; for bouquets. 10 in. Sow autumn and spring.

Maurandya 6d per pkt.

724 **Barclayana.** Beautiful blue flowers.
725 **Alba.** Pure white flowers.
726 **Rosea.** Rose-coloured flowers.
Superb perennial climber, quick growing and free-blooming; foliage small, of a lively green colour; like a rich, friable soil. Sow autumn and spring.

Medeola 6d per pkt.

728 **Asparagoides.** Flowers white.
Climbing bush-house plant; valuable for vases. Soak seed in tepid water before sowing. Hardy perennials. Sow in spring in pots.

Michauxia 3d per pkt.

730 **Campanulata.** Large, white, bell-shaped.
A handsome hardy plant, effective for borders; thrive well in warm, sheltered spots.

Mesembryanthemum 3d per pkt.

732 **Tricolour.** Crimson, white, and purple; suits sandy soil well.
733 **Crystallinum** (Ice Plant). Peculiar glistening foliage, small white flowers.
734 **Cordifollium Variegatum.** A variegated-leaved variety.
Beautiful dwarf-growing plants, of compact habit; half-hardy perennials. Sow spring and summer.

Mignonette 3d per pkt.

736 **Large Flowered.** Very fragrant, fine spikes.
737 **Parson's New White.** Sweet-scented.
738 **Crimson Giant.** Large flowers, fine colour.
739 **Crimson Queen.** Beautiful spike, deep red.
740 **Gabrielle.** Robust large spikes, red.
741 **Goliath.** Enormous spikes, double red.
742 **Ruby.** "Machet" variety, coppery scarlet.
743 **Victoria.** Very dark red, fine spikes.
744 **Mile's Hybrid Spiral.** Dwarf long spikes.
745 **Machet.** Dwarf, massive spikes, scented, red.
746 **Machet Golden.** Large spikes, yellow flowers.
747 **Machet "King of Dwarfs."** Large spikes.
748 **Bismarck.** Very large, spikes reddish tinge.
749 **Golden Queen.** Bright yellow; pyramidal.
750 **Giant Pyramidal.** Fine spikes and fragrant.
It is easily grown; some of the new varieties make excellent pot plants. Sow autumn or spring.

Mimulus (Monkey Flower) 6d pkt.

760 **Tigrinus.** Showy, spotted; single and double.
761 **Tigrinus Grandiflorus, Duplex.** Flowers double.
762 **Nobilis.** Fine dwarf, double.
673 **Moschatus** (Musk). Scented, yellow flower.
764 **Moschatus Compactus** (Musk). Of erect habit; dwarf.
Charming plant for pot culture; likes rich, light soil and a liberal supply of water. Perennials. Sow in spring.

Mina (Climber) 6d per pkt.

767 **Lobata.** Its beautiful creamy-white flowers are bright orange when half blown, and when in bud of a vivid red.
Half-hardy annual climber. 20 ft. Sow in spring.

Musk (See Mimulus Moschatus)

Myosotis (Forget-me-not) 3d & 6d pkt.

770 **Palustris.** Bright blue; the true Forget-me-not.
771 **Palustris Tom Thumb.** Very dwarf. 6d pkt.
772 **Alpestris Stricta Rosea.** Upright growing, pink. 6d pkt.
773 **Alpestris Grandiflora** (Royal Blue). Large flowers. 6d pkt.
774 **Sylvatica.** Clear bright blue.
775 **Elegantissima.** White, blue and rose.
776 **Victoria.** Dwarf; globular; sky blue. 6d pkt.
777 **Azorica.** Dark blue, white eye; biennial variety.
778 **Robusta Grandiflora.** Large flowering; blue. 6d pkt.
Charming hardy plants. Sow in autumn.

Wonderful Results!

"I am pleased to state that the Flower Seeds received from you some months ago turned out to my entire satisfaction, and gave wonderful results."—C. E. Ogden, *East Maitland.*—7-2-05.

Our Seeds are always the Best

Nasturtium 3d per pkt.

DWARF VARIETIES.

781 **Beauty.** Pretty yellow and scarlet.
782 **Crimson.** Pretty, striking colour.
783 **Empress of India.** Bright; beautiful scarlet.
784 **Golden King.** Very handsome variety.
785 **King of Tom Thumbs.** Scarlet.
786 **King Theodore.** Darkest of all; nearly black.
787 **Pearl.** A clear, soft white.
788 **Rose.** Delicate, soft, rosy colour.
789 **Scarlet.** Bright and beautiful.
790 **Yellow.** Bright rich colour.
791 **Finest Mixed Tom Thumb.**

TALL VARIETIES.

795 **Moonlight.** Flowers pale straw colour, crinkled.
796 **Sunlight.** Flowers clear rich golden yellow.
797 **Spitfire.** Bright scarlet flowers.

Our Seeds are always the Best

"I have been growing Pansies as a hobby and specialty the past 30 years, but in all that time I never saw such magnificent Pansies as to colouring and size as I got from a packet of one of your Novelties, viz., the "Orchid" Flowering Pansy." —N. L. Ball, Glanmorgan Vale, Q'land.—*18-10-05.*

"I obtained First Prize last year for best collection of Pansies. Seed obtained from your establishment."—W. Jurd, *Wellington.*—*10-4-05.*

"The Pansies I grew from your seed last year were a great success. Everyone admired them; the flowers were so large and such choice colours." —M. Miller, *Rose Valley.*- *14-4-05.*

Pansy, Masterpiece

Flower Seeds—General List *(continued)*

Phlox Drummondii — 3d and 6d pkt.

967 **Grandiflora Finest Mixed.** The finest strain in cultivation.
968 **Grandiflora Alba.** Single white; free blooming.
969 **Grandiflora Dark Purple.** Beautiful rich colour.
970 **Grandiflora Scarlet.** Most brilliant.
971 **Grandiflora Red, White Striped.** Very effective.
972 **Grandiflora Stellata Splendens.** White, stellated centre.
973 **Alba Oculata Superba.** Pure white flowers with carmine red eye.
974 **Alba fl. pl., Double White.**
975 **Cuspidata.** Distinct class, commonly known as "Star Phlox."
976 **Cuspidata Silver Leaved.** 6d per pkt.
977 **Nana Compacta.** Dwarf variety, with a profusion of exquisite flowers; bush-like habit.
978 **Nana Compacta Radiata.** Fine pointed star-like flowers, crimson with white markings.

If sown in the autumn it will flower in the winter, and continue to bloom for several months. A later sowing, in early spring, will give plants which will bloom throughout the summer, and if planted in beds, produce a most dazzling effect, as the plants are covered with flowers, which often entirely hide the foliage.

Heynholdi Section — 6d per pkt.

987 **Heynholdi Alba.** Pure white.
988 **Heynholdi Cardinalis.** Splendid tints.
989 **Heynholdi Empress Augusta.** Copper rose.
990 **Heynholdi Rosea Intus Alba.** Pink and white.
991 **Heynholdi Finest Mixed.**

This section is particularly adapted to pot culture.

Portulacca — 3d per pkt.

994 **Grandiflora.** Double, free flowering; mixed.
995 **Grandiflora Compacta.** A very compact variety.
996 **Striata.** Beautiful white flowers, striped and spotted.
997 **Aurea.** Deep golden colours, dark throat; handsome.

Particularly well adapted to our climate, and flowers magnificently in the warmest situation; suitable for vases or rock work; very dwarf, of a trailing habit; hardy annuals. Sow spring and summer.

Potentilla — 3d per pkt.

1012 **Finest Mixed.** The colours are shades of red and brown, some striped.

Handsome herbaceous perennials. Sow autumn and spring. 12 inches.

Primula Sinensis — 1s per pkt.

(Chinese Primrose)

1015 **Fimbriata Finest Mixed.** Lovely shades.
1016 **Alba Magnifica.** Lovely pure white.
1017 **Coccinea Magnifica.** Fringed; large red.
1018 **Meteor.** Fringed; deep rich crimson.
1019 **Fringed Fern-leaved.** Red.
1020 **Fringed Fern-leaved.** White.

Tender perennial, suitable only for pot culture. Sow in autumn.

Primula Vulgaris — 6d per pkt.

1025 (English Primrose)

Succeeds best in a cool, shady situation.

Pyrethrum — 3d per pkt.

1027 **Aureum.** Leaves are a bright golden colour, most effective as carpet bedding or ribbon bordering; hardy perennial. Sow in spring. 9 inches.
1028 **Aureum Cristatum.** Curled leaves; very dwarf in habit.
1029 **Selaginoides.** Form of Aureum, with crest-like leaves; handsome for carpet bedding.
1030 **Roseum Hybridum Grandiflorum.** Perennial flowering plant, single flowers, produced on long wiry stems; good foliage. Suitable for colder districts. 18 inches.

Ranunculus — 3d per pkt.

1034 **Asiaticus Superbissimus.** Flowers of a great variety of colour the first season. Sow in early autumn.

Roots or tubers of the above can be obtained in March. See Bulb List.

Rhodanthe (Everlasting) — 3d per pkt.

1036 **Maculata.** Beautiful rosy pink.
1037 **Maculata Alba.** Pure white.
1038 **Manglesi Major.** Large bright pink.

One of the choicest of early flowering everlastings. Half-hardy annuals. Sow in spring. 12 inches.

Ricinus (Castor Oil Plant) — 3d per pkt.

1041 **Gibsoni.** Large, handsome purple foliaged plant.
1042 **Zanzibariensis.** Immense leaves, measuring 2 to 2½ feet across. Biennial. Sow in spring.

Rocket (Hesperus Matronalis) — 3d pkt.

1044 **Sweet.** (DAME'S VIOLET). Fragrant, purple and white.

Profuse bloomer; perennial. Sow autumn or spring. 18 inches.

Romneya (Californian Tree Poppy) — 6d pkt.

1045 **Coulteri.** Pure white flowers 4 to 5 inches in diameter, with delicate perfume.

A hardy perennial plant, suitable for out-door cultivation; foliage deeply cut and glaucus. Sow spring. 6 ft.

Rosa Polyantha — 1s per pkt.

1047 **Multiflora.** Graceful clusters of single, double, and semi-double flowers.

Fowers the first year from seed; height, about one foot. Sow in July and August, under shelter, and plant out in September and October.

Rudbeckia — 6d per pkt.

1050 **Bicolour Superba.** yellow with dark spots. 2 feet.
1051 **Neumanni.** Vivid yellow; dwarf.

A beautiful class of annuals; splendid for cutting. Sow in spring.

Saintpaulia — 1s per pkt.

1054 **Ionantha.** Leaves of a beautiful dark green; flowers clear blue violet tint, shading to yellow.

For glass or bush-house cultivation. The seed being very fine, it is necessary to bestow extra care and attention to successfully germinate it. Biennial. Sow spring.

Salvia — 6d per pkt.

1056 **Splendens.** Scarlet; very showy and attractive.
1057 **Ingenieur Clavenad.** Spikes large; fiery scarlet.
1058 **Argentea.** Silvery; flowers pinkish white; very fine.
1059 **Patens.** Intense bright blue.
1060 **Rœmeriana.** A beautiful dwarf scarlet.

Most striking garden plants; in suitable situations will bloom all the year round; highly recommended Half-hardy biennials. Sow in the spring.

Scabiosa (Mourning Bride) — 3d pkt.

1065 **Finest Dwarf Double Mixed.** Hardy annual; free blooming. Sow in autumn or spring. 3 inches.
1066 **Golden Yellow Double.** Compact double flowers of golden yellow.
1067 **Caucasica.** Handsome hardy perennial, 2 to 3 feet high; excellent for cut flowers; lilac blue shade. 6d per pkt.

Shizanthus — 3d per pkt.

1070 **Grahami.** Beautiful red and shades.
1071 **Grandiflorus Oculatus.** Purple spots.
1072 **Pinnatus.** Beautiful bright blue.
1073 **Pinnatus Niveus.** A pure white variety.
1074 **Pyramidalis** (TOM THUMB). Various colours.

Annuals, requiring sheltered situation; well suited for pot culture, handsome foliage, and bear thousands of Butterfly-like blossoms. Sow autumn and spring.

Sensitive Plant — 3d per pkt.

1078 **Mimosa Pudica.** Very pretty foliage.

A tender annual. Sow in spring. 18 inches.

Shasta Daisy (See Chrysanthemum Leu)

Silene (Catchfly) — 3d per pkt.

1080 **Pendula.** Single, bright rosy red. 18 inches.
1081 **Compacta Rosea.** Double, dwarf, bright rose. 6 in.

Showy annual; flowers freely during the spring months. Sow autumn or spring.

Snapdragon (See Antirrhinum)

Solanum — 6d per pkt.

1083 **Hybridum** (EMPRESS). Coral-red berries.
1084 **Wetherill's Hybrids.** Choice strain.

Produces a profusion of coral-red berries; handsome pot plant. Hardy annual. Sow autumn and spring.

Salpiglossis

Salpiglossis — 3d per pkt.

1087 **Grandiflora.** Tall mixed.
1088 **Grandiflora Superbissima.** A superior strain.

Beautiful showy annuals, richly coloured, delicately veined, and mottled blossoms. Sow autumn and spring.

Statice — 3d per pkt.

1097 **Suworowi.** Annual; spikes of bright rose-coloured flowers. Sow spring.
1098 **Perennial Varieties.** Mixed.

Flowers excellent for cutting; well adapted for drying as everlastings.

Sunflower (See Helianthus)

Sweet Peas (See Lathyrus)

Sweet William (See Dianthus Barbatus)

Stock — 3d per pkt.

TEN-WEEK VARIETIES

1100 **Large Flowered Dwarf.** Very showy; all colours.
1101 **Giant Perfection.** Beautiful double spikes.
1102 **Victoria Bouquet.** Beautiful strain; double flowers.
1103 **Dwarf Pyramidal.** Large flowering; double.
1104 **Princess May.** Beautiful primrose colour.
1105 **Perpetual Flowering.** Various colours.
1106 **Triumph.** Brilliant crimson.

INTERMEDIATE AND BROMPTON VARIETIES

1113 **Intermediate Scarlet.** Autumn stock, beautiful.
1114 **East Lothian White.** Very fine pure white.
1115 **Brompton Scarlet.** Very showy and distinct.
1116 **Brompton White.** Fine spikes of clear pure white.
1117 **Brompton New Giant.** Beautiful white, large size.
1118 **Brompton Dwarf, Sunrise.** Large flowers, bright rose; numerous spikes; 70 per cent. double.
1119 **Queen of Whites, Intermediate.** Ever-blooming variety, growing 1½ to 2 feet: one of the best white sorts in cultivation.
1120 **Empress Elizabeth.** Large rose-shaped flowers, lovely dark red, early, very double.

Stocks succeed well in any part of our State if the season is favourable, if they are grown in good, rich soil. Sow during the autumn or spring.

Tacsonia — 1s per pkt.

1126 **Van Volxemi.** Bright crimson flowers.

Handsome evergreen climber, resembling a Passion Flower.

Tagetes — 3d per pkt.

1128 **Signata Pumila.** Bright orange yellow flowers.

Pretty and effective hardy annual of the Marigold tribe. Sow autumn or spring. 12 inches.

Thunbergia — 6d per pkt.

1130 **Choicest Mixed.** Flowers various colours.

Half-hardy annual, of twining habit. Sow spring.

Torenia — 1s per pkt.

1133 **Bailloni.** Flowers yellow, brownish red throat.
1134 **Fournieri Grandiflora.** Purple and white.

Ornamental pot plant of great beauty; tender perennial, for glass or bush-house cultivation. 12 in.

Tropæolum — 6d per pkt.

1135 **Canariensis** (CANARY CREEPER). Foliage delicate, flowers golden.

Tender annual; fine creeper, free grower. Sow spring.

Verbascum — 6d per pkt.

1138 **Pannosum.** Large sulphur-yellow flowers.

Grows to five feet; splendid leaves, 2 feet long and 8 inches wide; flower stalks 2 feet long; perennial. Sow spring or autumn.

Verbena — 6d per pkt.

1140 **Mammoth Hybrid.** Mixed; extra large.
1141 **Auricula Flowered.** Mixed colours.
1142 **Coccinea.** Scarlet, very fine, 6 inches.
1143 **Italian Striped.** Handsome striped.
1144 **Cœrulea.** Shades of blue; effective.
1145 **Candidissima.** Pure white trusses of flowers.
1146 **Erinoides Alba.** Branching freely; profusion of trusses of white flowers.

Most useful bedding plants; very hardy. Sow autumn and spring.

Violet — 6d per pkt.

1150 **Odorata.** (SWEET VIOLET). Hardy perennial.
1151 **The Czar.** Very large, fragrant; purple.
1152 **Alba.** Pretty white; distinct. 6 in.

Virginian Stock — 3d per pkt.

1157 **Red.** Good rich colour. 6 inches.
1158 **White.** Fine pure white. 6 inches.

Dwarf, free-blooming, hardy annual. Sow spring.

Wallflower — 3d and 6d per pkt.

1160 **Blood Red Single.** The old favourite; distinct.
1161 **Choicest Mixed.** Single; blood-red to pale yellow.
1162 **Cloth of Gold.** Distinct rich golden yellow.
1163 **Eastern Queen.** Single dwarf; bright chamois.
1164 **Ruby Gem.** Single; beautiful ruby violet.
1165 **Early Single.** Annual, sweet scented.
1166 **Double German.** Grand strain, choicest double. 6d per pkt.

Hardy biennials. Sow autumn or spring. 12 inches.

Whitlavia — 3d per pkt.

1171 **Grandiflora.** Bright blue; very pretty. 6 inches.
1172 **Gloxinoides.** White and blue; showy. 6 inches.

Charming Californian annuals. Sow in autumn and spring.

Zinnia — 3d per pkt.

1174 **Grandiflora Plenissima.** Immense size and robust growth; brilliant colours.
1175 **Grandiflora Queen Victoria.** Double white.
1176 **Elegans Curled and Crested.** Flowers beautifully twisted and curled.
1177 **Elegans Double Striped or Zebra.** Flowers distinctly striped. 18 inches.
1178 **Elegans Pumila fl. pl.** Beautiful dwarf strain; wonderful shades of colour.
1179 **Elegans Tom Thumb Double.** Brilliant colours; very dwarf; only 6 inches.
1180 **Elegans Liliput fl. pl.** Mixed; a very small flowering class of double Zinnias, for front borders.
1181 **Elegans Liliput fl. pl. Scarlet Gem.** Double flowers, bright scarlet.

One of the grandest annuals in cultivation. Sow in spring and summer.

Department of Farm Seeds

Swede and other Field Turnips

2s per lb.
Post free, 2s 6d

CULTURE. Rich, strong land will produce fine Turnips if well ploughed, harrowed and rolled. Sow Swedes January or February in drills 4 feet apart, and thin the plants to 18 inches apart; 2 to 3 lbs. of seed will sow an acre.

Anderson's Imperial Purple Top Splendid heavy swede; keeps well.
Skirving's Purple Top Heavy cropper.
East Lothian Purple Top Good keeper.
Sutton's Champion Purple Top Fine shape and heavy cropper.
Emperor Green Top Fine keeping variety.
Purple Top Yellow Aberdeen Turnip Large, good quality.
Green Top Yellow Aberdeen Turnip Hardy, good keeper.
White Pomeranian Globe Turnip Large and useful.

Mangel Wurzel or Mangold

1s 6d per lb.
Post free, 2s

Valuable root crop, and can be stored for many months.

CULTURE. The land should be ploughed deeply and harrowed lightly. Sow in drills 4 feet apart, thin to 12 to 18 inches between each plant; 3 to 4 lbs. of seed is sufficient for an acre, and soaking the seed in warm water will hasten germination. Sow August and September.

Mammoth Long Red Best variety for deep, well-worked land.
Long Yellow For deep soil.
Yellow Globe Suitable for shallow soils.

Buckwheat

CULTURE. A quick-growing fodder plant. Produces a heavy crop in a few weeks, provided weather is favourable; it will be killed by frost, however. Sow 4 to 5 pecks broadcast, and 1½ to 2 pecks in drills.

Silver Hulled **9s** per bus.
Japanese Earlier than the Silver Hulled. **8s 6d** per bushel.

Field Horse Bean

Heligoland or Tick
5s to **6s** per bushel.

CULTURE.—Land for this crop should be deeply ploughed and well-worked; a good strong soil is preferable to light or sandy soil. April is the best month to sow. One bushel per acre in drills 2 to 3 feet apart.

Florida Velvet Bean

6d per lb.
Special Price for Quantity.

A nitrogenous plant, enriching the ground in a wonderful manner; stock are also very fond of it, either as green fodder or when matured.

CULTURE.—Sow in the spring in hills 4 feet apart, and the same distance between the rows, two or three beans in each hill. 15 lbs. to 20 lbs. will sow an acre.

Chicory

Large Rooted
2s 6d per lb.

CULTURE.—Chicory should be grown in a similar manner to Carrots. Drills 18 inches apart, and about an inch deep; plants thinned to 9 inches apart in the rows. A loamy or sandy soil is most suitable. Sow during August and September. Five pounds of seed will be ample for an acre.

Cattle Melon

5s per lb., post free.

CULTURE.—Deeply dig or trench the ground; add manure abundantly; plant in hills three to four yards apart, a few seeds in each. Sow in September or October.

Cattle Cabbage

Robinson's Champion Ox
4s per lb., post free.

CULTURE.—Sow in June in seed beds and transplant in August and September. Another sowing may also be made in January or February. One pound of seed will give plants for one acre. Land must be strong and rich.

Field Carrot

3s per lb., post free.

CULTURE.—Prefers land of a light loamy or sandy description, deeply tilled. Never use stable manure when putting in this crop. Four pounds will sow an acre in drills. Sow in Sept., again in Feby. or March.

White Belgian **Large Red Altringham** **Long Red Surrey**

Soja Bean (Var. Soja d'Etampes).

1s per lb.

CULTURE. Fine green fodder for stock, cut when in flower; sow broadcast, at the rate of about 7 lbs. per acre. October to January.

Field Pea

Partridge or Grey, 5s to 6s bushel
Large Blue, 10s bushel

CULTURE. Sow in drills or broadcast in April, May, or June. 1½ to 2 bus. per acre.

Sheep Burnet

9d per lb.
Special Price for Large Lots

CULTURE. Valuable forage plant specially adapted for poor, arid soils that would not grow Lucerne. Can be sown alone, or with grass seeds for hay or pasture. Sow in March or April broadcast at the rate of 30 to 40 lbs. per acre; 5 to 6 lbs. when mixed with grass seeds.

Cow Pea

3d per lb. in small lots

White Black eye.
Clay Coloured Light shade of brick-red.
Black Same size as others, perfectly black.
Whip-poor-Will Speckled liver colour.

SPECIAL PRICES FOR LARGE LOTS AND PER BUSHEL.

THE COW PEA produces large crops of first-class fodder during dry seasons, and stock of every kind are particularly fond of it. It has great value as a green manure, and land which is poor or worn out cannot be better manured than by digging in a crop of the Cow Pea. Like all leguminous plants, it takes nitrogen from the atmosphere and deposits it in the soil during growth.

CULTURE. Spring is the best time to sow, if the crop is intended for green feed. Sow in drills 2½ to 3 feet wide; about 10 lbs. of seed will sow an acre, but for green manuring 30 to 50 lbs. should be sown broadcast in summer and the crop ploughed down just when the seed pods have formed.

Thousand Headed Kale

3s per lb.

A valuable fodder plant for stock of every kind.

CULTURE. Sow in June in seed beds of poor soil for transplanting August and September. Another sowing may also be made in January or February. One pound of seed will give plants for one acre if raised in a seed bed—or in drills 2 to 3 lbs. per acre, thinning where required. Land must be strong, rich and well worked. Bone dust at the rate of 3 to 4 cwt. per acre, where farmyard manures are not available.

Sugar Beet

1s 6d per lb.

Vilmorin's Improved White
Klein Wanzleben, White

Roots make excellent food for dairy cattle and pigs, and yield heavy crops.
CULTURE. The cultivation is much the same as Mangel Wurzel.

Onion, as a Field Crop

Post Free at prices named.

	per lb.		per lb.
Anderson's Market Model	**6 0**	**Ex. Early Yellow Globe**	**6 0**
Brown Spanish	**5 0**	**Silver Queen**	**6 0**
Brown Globe	**5 0**	**Anderson's Silver King**	**6 0**
Ex. Early Flat Red ..	**6 0**	**Silver Skin Pickling** ..	**6 0**

CULTURE. The soil can hardly be too rich, should be well worked, and made solid and compact, before and after sowing. Cover the seed as lightly as possible. It is best to give no other covering than pressing it in with the roller, the seed being sown quite on the surface. This is necessary to secure the proper position of the bulbs above ground. When the land is likely to be weedy, drilling or sowing in rows should always be practised. For large sized Onions, the seed should be sown in beds in April, and when large enough to handle transplant in rows 2 feet apart, and 9 inches apart in the rows. The best time to sow for the main crop of Onions in the colder parts of the State is August. In the coastal districts, however, and the warmer parts of the State, sow the seed in May, June and July, according to situation, so that the crop will have a chance to mature before the hot weather sets in.

Sow in Drills, with machine ...	4 lbs.	seed to the acre,	ordinary crop.
Sow in Drills (open), with hand	8 ,,	,,	,,
Sow in Drills, with machine ...	8 ,,	,,	for pickling onions.
Sow in Drills (open), with hand	15 ,,	,,	,,
Sow Broadcast	20 ,,	,,	,,

Cattle Pumpkin

Anderson's Mammoth, 5s per lb.
Gramma, 6s per lb.

CULTURE. Sow about the middle of October as a field crop, and until the end of November. The land should be sub-soiled as well as ploughed, and manure should be distributed over the whole area devoted to the crop and dug in. 3 or 4 plants to remain in each hill, which should be 3 to 6 yards apart. One pound of seed will sow an acre.

Rye, Common

5s to **6s** per bushel.

CULTURE. Excellent forage plant. Can be sown alone or with tares. Yields most nutritious green fodder. Also grown for Straw, which is straight and strong. Sow from March to July, broadcast; one bushel per acre.

Thousand Fold 6 to 7 feet high; heads 6 to 8 inches in length, and yields 40 to 50 bushels per acre. **6s** per bushel.

"The Dwarf Essex Rape Seed I got from you has made wonderful growth, and is the admiration of all who see it. The Thousand Fold Rye Seed got from you last season produced a wonderful crop, going up 8 feet, and over in some places. We have a patch in now which promises to do still better. If your Thousand Rye is cut when 3 or 4 feet high, and the stubble is topdressed with a good manure, and then harrowed, it will produce a second crop, often better than the first; in fact we once got three crops from it measuring 4 feet to 4 feet 6 inches, so that in all it made a growth of 11 feet 6 inches."—S. IRVINE, *Liverpool.—23-7-05.*

Sainfoin or Esparcette

1s 6d per lb.

CULTURE. Particularly adapted to our dry climate. A rather light soil, deeply worked, and well drained, is most suited for it. Sow broadcast at the rate of 40 lbs. per acre March and April.

Sunflower

1s per lb.

CULTURE. Sow August to November in drills 3 to 4 feet apart, and thin same distance between each plant; seven pounds of seed should be sown per acre.

- FLOWER SEED NOVELTIES -

Nicotiana Sanderæ

Assorted Colours

HE variety of Nicotiana Sanderæ, which was distributed as a velty for 1905, has proved a decided success in the Horticul-ral field. The large number of testimonials and press extracts m all parts of the world go to show that the descriptions ven by the raisers in the first instance were not in the least er-estimated.

For 1906 we are enabled to offer New Hybrid strains of is charming Annual, and from what has been said of these by owers who have cultivated them, we are led to believe that ey will in every way come up to the high standard of ex-llence attained by the original variety.

The new strain is sold in packets containing eight stinct varieties, as follows:—Purple, White, Pink, Dark and ght Red, Crimson, Violet, and Salmon.

Price per packet containing 8 varieties, 1s 6d

The Lovely Aquilegia

Long-Spurred and other Hybrids

SEE COLOURED FRONT COVER

THE new types of the Aquilegia are so different from the old "Columbine" as to be almost entitled to rank as a new flower; they are certainly a totally different class, and are extremely beautiful. The colourings in some of the varieties are so vivid as to give them the appearance of Orchids. We do not know of a more charming class of Hardy Perennials; they grow easily from seed, and like good, rich, tenacious soil, and plenty of water in the flowering season. We recommend all amateurs to grow the new types of Aquilegias.

Superb Mixture of Selected Long-Spurred Single Varieties — 6d per pkt.

Choice Mixture of Single and Double Flowering Sorts — 6d per pkt.

(As illustrated on Front Cover)

See General List in Catalogue for other varieties

Aquilegia Haylodgensis "Delicatissima"

AMONGST the many varieties of the magnificent hybrids of Aquilegia Haylodgensis this one has such a tender hue as can only be found again on some tropical orchids. The tender sateen-rose of the spurs passes imperceptibly into the delicate light yellow of the crown. The peculiar shape of the very long spurred flowers heightens the lovely appearance, which is still increased by the elegant bearing of this Aquilegia. The slender flower-stems raise freely above the beautiful effective foliage, and in early spring they are covered with the flowers resembling the horns of plenty.

1s per packet.

"Pearl" Aster

Flower Seed Novelties—continued

"Pearl" Aster — 1s per packet.

A NEW class of Aster, the flowers of which measure from 5 to 6 inches in circumference, shaped like little flat balls. The plants grow about 20 inches high, and are strikingly graceful in appearance, bearing about 20 flowers on slender stalks 8 to 12 inches long; especially valuable for cutting or bedding purposes. We offer the seed in packets containing a **mixture** of three colours, viz., brilliant rose, rosy lilac, and light blue.

"Hercules" Aster — 1s per packet.

A NEW strain from the same raiser as the Hohenzollern type, which has gained a high position amongst growers of Asters. This new class is of imposing appearance, with strong stems about 20 inches high, with side branches each of which bear a number of flowers with very long petals. The blooms attain a large size, being as much as 6 inches in diameter, of pure white colour. Splendid for cutting.

"Elegance" Aster

A REALLY first-class single Aster, which has much to recommend it. The plants are healthy, vigorous growers, of pyramidal habit; very floriferous, each flower on a long stalk. The flowers have long elegantly waved petals with a small yellow centre. Last well as cut flowers.

We offer them in packets of three distinct colours, viz., white, lavender blue, and dark blue, **each 1s per packet**; and in mixture, **1s per packet.**

"Elegance" Aster

"Hercules" Aster

"Giant Margaret" Carnation

1s per packet.

AN improved type of the much admired Margaret Carnation, which is so adaptable to our Australian climate. The strain we now offer contains a fine mixture of colours, and the flowers are very large and double and well formed, and are borne on strong vigorous stems.

Very Pleased!

"Your Plants and Seeds grow splendidly up here, and we are very pleased with them, and recommend them to our friends."—Mrs JARROLD, Dalby, Q.—*14-6-05*

Carnation, "Giant Margaret"

Stock, "Crimson King" — 1s per packet.

THIS is a companion flower to the two varieties introduced by us during the last two seasons, viz., "Beauty of Nice" and "Queen Alexandra." Both of these beautiful large flowering Stocks have proved themselves worthy additions to our list, and we anticipate that this new variety, "Crimson King," coming as it does from the same raiser, will uphold the high character already formed of its predecessors.

Flower Seed Novelties

continued

Calliopsis Bicolor Nana "Golden Ray."

Calliopsis Bicolor Nana

"GOLDEN RAY" 1s per packet

THIS novelty has quite remarkable pretty flowers. The edge of each flower-leaf is turned down, thus resembling a small single Cactus Dahlia. From out the dark purplish-brown centre the leaflets are turning into bright golden yellow rays, thus giving each flower an elegant and graceful appearance. Forming round bushes of about 6 to 8 inches high, the plant is literally covered with blooms. The striking coloration of this pretty Calliopsis, its regular growth, its easy culture and modesty regarding the soil, for all this we can warmly recommend this new introduction.

Centaurea

"IMPERIALIS GIGANTEA"

9d per packet.

AN extremely vigorous upright bush about 4 feet high, with large pure white sweetly-scented flowers of noble form, born on strong straight stalks, upwards of 2 feet long. Very hardy, and remains in flower for a long period.

Centaurea "Imperialis Gigantea"

Cineraria Radiata Hybrida

Cineraria

"RADIATA HYBRIDA"

1s per packet.

QUITE a new and distinct class, the Cactus or star-shaped floweret of which gives it an exceedingly pretty and elegant appearance. The flowers last a long while, and are quite adaptable for cut flowers as well as for decorative purposes. The new and fashionable shades and colours are remarkable in this novelty. Quite hardy, and easy of cultivation either in or out doors.

Rehmannia Angulata

Helianthus (WHITE)

"CUCUMERIFOLIUS NANUS"

A DWARF bushy sunflower, 2 feet high, with lovely long-stemmed *white* flowers. Very useful for cutting. Comes true from seed. **6d per packet.**

Maurandya Grandiflora

DARK BLUE VIVID ROSE

NEW large flowering varieties of the well-known climbing plant, in two colours (separately). The plants are vigorous growers, and produce freely flowers of very vivid colours. **9d per pkt. each; two pkts., 1s 3d**

Rehmannia Angulata

1s per packet.

AN herbaceous biennial introduced from Central China, which has been well received in Great Britain and the Continent. The plants grow 3 feet high, branching in the form of a narrow pyramid, with large lobed leaves of a reddish hue on the underside. The colour of the flower is an uncommon shade of rosy purple, with rich yellow throat adorned with purple spots and stripes. Can be planted in a sheltered border or as a bush or green house plant.

Maurandya Grandiflora

Flower Seed Novelties—(continued)

"Cecily" Phlox

Be sure and obtain a copy of our

BULB LIST

Dianthus "Snowdrift"

"Cecily" Phlox

Phlox Drummondii Grandiflora Nana Compacta

THIS type of Phlox has evolved from the two well-known classes, viz., Grandiflora and Nana Compacta. We secure here the beautiful large flowers of the Grandiflora type combined with the short sturdy growth of the Nana Compacta. These annuals are so well known and appreciated that we feel sure they require no further commendation from us.

We offer seed of this new class as follows :—

White with Lilac Hue, 1s ; Light Blue with White Centre, 1s ; or in Choice Mixture of 7 distinct colours

1s per packet.

A Splendid Lot !

"On coming here I brought a lot of your 1904 Seeds, Pansies, etc., and I have had splendid results from them in our station garden."

F. H. POWELL,
Stationmaster, Mudgee.
15-5-05.

Dianthus "Snowdrift"

1s per packet

ROBUST and freely branching plant, growing about a foot high, throwing up a multitude of strikingly large flowers 3 to 4 inches across, very double, with finely laciniated petals of the purest white; very effective; grown in masses.

In Splendid Condition !

"Seeds and Plants arrived safely. The Plants were in splendid condition, and looked as if they were just taken from the ground on landing here."

MISS E. LOVETT,
Hargreaves.
30-8-05.

Schizanthus "Grahami Niveus"

Schizanthus "Grahami Niveus"

1s per packet

THE Schizanthus has of late come very much to the fore, as it gives such a free and lasting display in return for the slight attention necessary for its cultivation.

This new variety grows about 2 feet high and possesses the bright green finely cut foliage of the Grahami section. The flowers are of pure snowy white, and are produced in great profusion, and can be used with advantage as cut flowers.

Schizanthus "Wisetonensis"

Schizanthus "Wisetonensis"

1s per packet

THIS lovely Schizanthus is literally covered with dainty little flowers, the ground colour of which is mostly white, dotted with delicate rose, and the upper petal is adorned by a spot varying in shade between golden yellow, carmine rose, and bright brown.

A novelty of 1904-5, which well deserves cultivation, either as a pot plant or in a sheltered border.

Anderson & Co.'s Novelty List for 1906

"Gladys Unwin" Sweet Pea

Pansy "Andromeda"

Pansy "Andromeda"

OWING to its remarkable beauty this new Pansy surpasses all other novelties in Pansies. The colour is a very delicate apple blossom, showing a soft lavender blue or rosy lilac with darker veining. A very striking flower, gay and elegant. **1s per packet**

NEW SWEET PEAS

"Helen Pierce" — 1s per packet

PURE WHITE, veined, mottled and marbled with bright blue, and might be called a Gloxinia-flowered type, something quite new in Sweet Peas. The effect is very fine, and it makes a beautiful decorative flower.

"Gladys Unwin" — 1s per packet

THIS new pink Sweet Pea of the Orchid-flowered strain was raised in England a year or two back, and has come to be regarded as a splendid type of flower. It is a large bold flower, with broad wings and standard. The colour is light pink. Very beautiful and fascinating.

"Countess Spencer" Seedlings

New race of gigantic Orchid-flowering tall Sweet Peas

THE largest in size of all Sweet Peas. This distinct race is wonderfully beautiful, and embraces the most exquisite shades of pink, orange, salmon and rose. The flowers are borne profusely on stout stems, 3 and 4 flowers on each, and the standard, although of a wavy nature, measures fully two inches across. A great variety of colour is obtainable from this selection. **1s per packet**

"Helen Lewis" — 1s per packet

ONE of the gigantic Orchid-flowered type of Sweet Pea—a sport from Countess Spencer. Colour a rich orange tint, standard large, heavily veined with salmon pink, shaded in lower portion with carmine; wings large, recurved; of a soft rosy pink veined with deeper shade.

"Lathyrus Pubescens"

The Blue-Flowering Everlasting Pea. **1s per packet**

"Helen Pierce" Sweet Pea

Recent Introductions in Flowers

All the following Flowers are Novelties of last Season and Recent Introductions of merit. We have tested them, and can strongly recommend the cultivation of every one.

Aquilegia "Long Spurred Double"

Aquilegia

Long-Spurred Double Flowering Hybrids

1s per packet.

THE graceful blossoms of this double flowering hybrid of the Californian Aquilegia are formed of several rows of Cornucopia-like petals. They present various shades of yellow, light and dark blue, and white, all being of the so-called long spurred type.

All our Packet Seeds Post Free

Nicotiana Sanderæ

1s per packet.

NICOTIANA SANDERÆ bears large brilliant carmine red flowers, on bushy, freely branching plants, 2 feet high. The shape of the flower resembles that of N. Affinis, but has a short, stout tube. The whole plant is laden with flowers from base to summit, and blooms continuously. Sow in autumn or spring.

Nicotiana Sanderæ

Greatest Satisfaction!

"I feel it my duty to announce to you that your Seeds give the best results that a practical gardener could wish for. I have used your Seeds for a number of years, and they have given the greatest satisfaction."—E. W. DOWSELL, Lismore.—*18-3-05*

A Great Surprise!

"Many thanks for promptitude in sending Seeds. The **5s** *Collection was a great surprise to me; I did not expect half that quantity of seed for the money. The Trees I got from you were looking fine."*—Mrs. GOLLEDGE, Tenterfield.—*19-9-05.*

Stock "Queen Alexandra"

PANSY "Mammoth"

1s per packet.

A MAGNIFICENT strain of Pansy, which has been selected from a very large collection of the best Continental varieties. The colours, both in blotches and markings, show some very attractive features. The plants are robust and hardy, and produce, under favourable conditions, a continuous supply of superb blooms for months.

STOCK "Queen Alexandra"

1s per packet.

A SPLENDID new variety of the same type as "Beauty of Nice," with flowers of delicate rosy purple. The plant throws up a strong centre spike about 1 foot high, surrounded with numerous side shoots, clad with beautiful large blossoms, which are exceptionally useful for cut blooms.

WINTER STOCK "Beauty of Nice"

1s per packet.

THIS is an early winter variety, and might almost be classed as a "Ten-week." Under good cultivation it will attain a height of 2 to 2½ feet; is well furnished with good foliage, and throws up a main flower spike of about 1 foot in length. It sends out a number of long side shoots, loosely covered with large and fragrant flowers nearly 2 inches across, of beautiful form and colour, a delicate shade of flesh pink, and very suitable for cut flowers. From 60 to 75 per cent. of double flowering plants may be relied on.

Recent Introductions in Flowers—*continued*

Ivy-Leaved Nasturtium

THIS new race of Nasturtium is a most distinct novelty, and will succeed anywhere and under widely divergent conditions. Can be utilised for window boxes, vases, hanging baskets, etc., as well as for open garden. The plants are of running growth, with star-like pointed leaves, which resemble the foliage of the English Ivy. The flowers are of an entirely new form from those of the ordinary Nasturtium. The petals are quite narrow, and set on a very slender foot stalk, producing an open star-like effect both striking and effective. We offer the following varieties, which are quite distinct:—

Original Strain. Flowers medium size, intense glowing scarlet.

Fordhook Fancy. The ground colour of the open star-like petals is generally golden yellow, with a rich velvety carmine blotch on each of the three lower petals. Foliage light green, distinctly lobed and veined.

Golden Gem. Flowers a rich golden shade of orange yellow; foliage light green, of medium size.

Flamingo. Rich dark green leaves; flowers rich orange scarlet, lower petals somewhat broader than "Golden Gem."

We can offer Seed of the above four varieties of Ivy-Leaved Nasturtium in separate packets, **6d** each; one packet each of the four varieties, **1s 6d**. Seed in Mixture, **6d** packet, post free.

Ivy-Leaved Nasturtium

Shasta Daisy "Alaska"

Gigantic Shasta Daisy "Alaska" — 1s per packet.

THE GIGANTIC SHASTA DAISY now introduced is a vast improvement on the original strain which we listed for the first time three years ago. The flowers of "Alaska" are of glistening whiteness, produced abundantly on clean strong stems, 2 to 3 feet long. They average 4½ to 5 inches in diameter, with a very small disc, and the petals are long and broad. The plants are unusually vigorous, but compact and graceful.

Salvia "Bonfire"

6d per packet.

DWARF bushy habit, 2½ feet high, covered with erect spikes of brilliant scarlet flowers. Though not a novelty, it is a decided acquisition.

Chrysanthemum (Carinatum Radiatum Aureum) "GOLDEN WHEEL" — 6d per packet.

A NEW and pretty group of Annual Chrysanthemums in which the flowers assume a peculiar form; the quill-shaped ray florets standing out all round the disc, like the spokes of a wheel. Valuable flowers for cutting. Golden yellow, purple centre.

Two Lovely Flowering Gums

Eucalyptus Erythronema is a graceful shrub or small tree, native of the drier parts of Western Australia. It is known only to a few people, and is one of the prettiest of the Eucalyptus flora of the Western State. Its flowers vary from a flesh pink to beautiful glowing red. **1s per packet.**

Eucalyptus Occidentalis is the "Flat-topped Yate" of Western Australia. It bears a profusion of yellow flowers, with a slight greenish shade, and is well worthy of cultivation as an ornamental tree. **1s per packet.**

Recent Introductions in Flowers—*continued*

Delphinium "Kelway's Choicest Show" 1s per packet

SAVED from celebrated named sorts. The demand for this beautiful perennial flowering plant is steadily on the increase. It is really a magnificent thing. The very handsome foliage, added to the beauty of the colours and the striking looking spikes of flowers, tend to make it one of the most popular of our spring and summer flowering plants. The character of the strain of seed now offered is such that we are convinced that amateurs and others who grow this for exhibition and show purposes will not fail to take advantage of this offer.

Delphinium Kelway's Choicest Show

Sweet Pea

New Extremely Early, called "NEW EARLIEST SUNBEAMS"

THE flowers are large, fine substance, and well formed; generally borne three on a stem, about the same height as Mont Blanc; a rich primrose colour; come into flower at least two weeks before the general run of Sweet Peas. **3d packet.**

Sweet Pea "New Earliest Sunbeams"

Carnation (Perpetual or Tree) 2s per packet.

AS we have so many enthusiastic growers of this flower who are constantly on the lookout for something really extra good, we have no doubt that the reputation of the raisers will be a sufficient inducement for amateurs to procure a supply. This is really an exceptionally choice strain.

Cineraria (Single Flowered Grandiflora) "KELWAY'S MODEL" 2s per packet.

THIS strain is acknowledged by growers in Great Britain to be the finest in cultivation. We are quite sure that lovers of this graceful flowering plant in New South Wales will take advantage of this offer and secure a packet or two for immediate sowing. Can be grown in the open border in well-sheltered positions.

Pentstemon Saved from finest Named Varieties (Kelway's) 1s per packet.

THESE lovely perennial flowering plants are ever an attraction to the lover of choice florist flowers. The long spikes are well furnished with the beautifully coloured and spotted flowers of large size and choice shades.

Phlox—Perennial (Kelway's) 1s per packet.

THIS seed is also saved from the finest named sorts in the Messrs. Kelway's collection. Seeds take a long time to germinate.

Verbena (Extra Choice Large Flowering) 1s packet.

THE seed offered has been saved from the choicest named varieties as grown at Langport by Messrs. Kelway. The colours are sure to be good, and as the Verbena is such a useful plant for bedding purposes, the results from the purchase of some of this seed ought to be satisfactory.

Novelties in Vegetable Seeds

New Tomato "Landreth's Earliest"

NEW TOMATO "Landreth's Earliest"

Up to the present, Spark's Earliana Tomato, which has been so popular, was considered to be the earliest Large Red Tomato in cultivation, but this new variety, now offered for the first time in N.S. Wales, is earlier, and has larger fruit. It is a strong, vigorous grower; foliage large, and dark green. It fruits all over the plant, although not in large clusters—generally 4 or 5 in a bunch. The fruit is slightly flattened, and the flesh deep red.

All our Packet Seeds are Post Free

NEW WATER MELON "Calabria"

1s per packet; 1s 6d per oz.

AMONGST the many recommendations in favour of this new Water Melon are: large globular fruit, with dark green skin, which is firm but thin; the seeds small and white, and generally disposed in a single ring near the rind—an advantage in that the enjoyment of eating of the rich sugary fruit is not interfered with. The flesh is bright red, tender, and of the highest flavour.

NEW SWEET CORN "Peep o' Day"

1s per packet

A VARIETY of remarkable earliness and sweetness; wonderfully productive, with 2 to 5 ears on each stalk. Being a dwarf variety, permits of it being planted closer than the ordinary types. Sweet Corn is becoming almost a necessity in the kitchen garden, and in the districts where it is desirable to have everything maturing early, Peep o' Day Sweet Corn will be found a valuable acquisition.

"Peep o' Day" Sweet Corn

"The Tomato plants which you sent me have all struck and are doing splendidly. The Roses I got from you about June are doing well and some are flowering."
T. CORNFORTH,
Wollongong.
24-10-06.

OUR NEW CABBAGE
Anderson's "Pedigree"

Price: 1s pkt; 1s 6d oz.; 4s ¼ lb.; 15s lb. Post free

WE do not claim for this Cabbage any preponderance of qualities superior to any other, but we claim that it is without question one of the best that has ever been grown in N.S.W. for either market or domestic purposes. It is not gigantic, but a real wholesome, weighty, and solid hearting variety, that can be grown all the year round and will not run to seed. It has been grown specially for us from selected stock, and has been proved to be nothing more than what we have stated it to be.

"I received the plants in good condition. I was highly satisfied with them, as with everything I have received from you. I have had great satisfaction with them." MRS. W. BAKER,
Catherine Hill Bay.
15-3-05

Every Satisfaction!

"Thanks for your punctuality, also for sending me such nice articles. We have a nice garden here, but I like fresh flowers, and you have given me every satisfaction, so that you shall receive my patronage and that of my friends when they are wanting anything in your line."
—Mrs. Morehead, Wallace.—28-4-05.

New Bouvardias for... Season 1906

We are the only Firm offering these for this season

Ethel Kerslake. Flowers large pure white and highly perfumed, of the same type as Mrs. G. H. Kerslake. The plant is dwarf, and more branching habit, trusses larger and the flowers more freely produced. **3s 6d; post free, 4s**

Salmon Queen. An exceedingly fine Bouvardia, colour salmon, with a darker tube; distinct from any variety in commerce; of good branching habit, and flowers profusely through the whole season. **3s 6d; post free, 4s**

6 Absolutely New Cactus Dahlias

Offered in the Trade for the First Time by Anderson & Co.

The Set of these New Six (post free) **24/-**

Green Plants only, ready October to December

COLLECTION No. 1

Harbinger. Colour, soft salmon, shading to yellow in the centre; blooms large, deep and well quilled. Each floret terminates in a pretty tassel formation. A fine constant variety; of medium height. **4s**

Amethyst. Blooms medium to large, of most perfect form; tints quite new, being of pinkish-amethyst colour. An exceedingly attractive variety for all purposes. **5s**

Simplicity. Canary yellow, shading off to delicate primrose at the tips. The florets are long, narrow and beautifully incurved, and the blooms carried on long wiry stems. **4s**

King of Stripes. Deep golden yellow, striped and speckled crimson. Large bold flower, of excellent form and habit—a great advance in the yellow ground fancy type. **4s**

Mrs. J. H. Horton. This is a remarkably coloured variety, being of a beautiful bright tangerine tint—a most suitable tint for autumn decoration. **4s**

Queen of Roses. Flowers large, of splendid form, and colours a clear bright rose. The plant is of sturdy dwarf habit. **4s**

— COLLECTION No. 2—Post Free, 15s —

Some of these 6 have been already sent out.

Darkness. Rich, dark, velvety crimson, shd. blackish maroon; good petal and form. **2/6**

G. H. Kerslake. An extremely fascinating variety of a beautiful tint of carmine rose, rich and lustrous; large, fine form and habit; probably the best of my production. **3s 6d**

Mabel Kerslake. Both in purity of colour, habit and form, this is a decided advance upon other whites; the blooms are large, refined and handsome. **2s 6d**

R. O. Cummings. Colour deep, bronzy orange; extremely long, narrow, incurving petals forming a bloom of the very first order. **2s 6d**

Primrose Queen. A chaste and beautiful variety. Primrose, with just a blush of salmon-rose at the tips of florets; erect stems; form and habit of Mrs. Kerslake. **2s 6d**

Lilian Lockley. White, faintly flushed lilac in the early stages; petals incurved to the centre; excellent variety. **2s 6d**

Novelty Cactus Dahlias for 1906

Ambassador. Pure white flower of the best quality, excelling all others of this colour in its manner of throwing its flowers well up on stiff stems right above the foliage. **2s 6d**

Butterfly. Large flower, with long fluted florets; deep crimson at the base with conspicuous pure white tip, giving the whole flower a particularly attractive appearance. **2s 6d**

Ballet Girl. Another addition to the white tipped varieties, but perfectly distinct from Butterfly and the kinds already in commerce. The florets are more abundant. Colour, soft red at the base. **2s 6d**

Fred. H. Searl. One of the largest Cactus Dahlias yet raised. Flowers rich velvety maroon with long quilled florets, carried well over the foliage on long stiff wiry stems. Blooms fully 8 inches across. **3s 6d**

Cockatoo. Ground colour clear canary-yellow, which towards the outside of the flower assumes a pale fawn tint; every flower is heavily and distinctly tipped pure white. The colour is quite novel in Cactus Dahlias. **2s 6d**

Country Girl. Deep golden yellow, slightly bronzed with red. A large bold flower of the finest form. Good habit. **2s 6d**

Juliet. A beautiful shade of rosy pink, the extreme base of the florets paler in colour. Florets very long and narrow; the outer ones rather incurved. Stems long. **2s 6d**

Morning Glow. Bright golden yellow, shaded with soft tint of amber—a beautiful blending of colour. The form is good; it flowers freely, and blooms well above the foliage. **2s 6d**

Rosy Morn. A large flower of excellent form, and very constant throughout the whole season. In colour it is peach blossom, somewhat paler in tint towards the base of the flower and in the extreme centre. **2s 6d**

Rev. D. R. Williamson. Deep velvety crimson; even floret edged with bright carmine. A true cactus with long and narrow florets. Stems back and wire-like. **2s 6d**

Pink Pearl. A remarkably pretty shade of rich rosy pink, the florets in the centre and the extreme tips of those at the back of the flower being bluish white. The combination of the two tints gives the whole a distinct and pleasant character. **2s 6d**

Mrs. H. J. Jones. Scarlet edged cream, heavily tipped white. The best parti-coloured variety. **2s 6d**

Mrs. H. L. Brusson. Delicate salmon pink, on a pale yellow ground; florets very long. Beautiful. **2s 6d**

New Cactus Dahlias of 1905

Alberich. A fine type. Lovely terra-cotta colour. **1s**

C. N. Richardson. Rich yellow, sh'd rosy salmon. **1s 6d**

Duchess Agnes. Rose colour, lighter at points. **1s**

Fenella. Light yellow and lilac. Long stems. Good. **1s**

Fighting Mac. One of the best crimsons grown. **1s**

Flamme. Lovely carmine red, on yellow ground. **1s**

Gotelinde. Deep golden yellow. Fine autumn variety. **1s**

Ibis. Free flowering. Orange spotted, edged scarlet. **2s**

Ianthe. Buff ground, tipped pale rose, rosy centre. **2s**

Mrs. Egginton. Large. Scarlet, shaded crimson. **1s 6d**

Mrs. Jowett. A fine flower. Bright orange red. **1s**

Mrs. F. McQuade. Lovely pure white. Beautiful. **1s**

Oda. Splendid Dahlia. Violet, magenta points. **1s 6d**

Rother. Early flowering dwarf. Dark rich velvety red. **1s**

Syringa. Strongly twisted. A light silvery lilac. **1s**

Spitfire. Rich glowing scarlet, with claw-like petals. **1s**

Walthari. Clear cream colour. Dwarf in habit. **1s**

White Geiselher. White. **1s** **Zugabe.** Rose. **1s**

NEW ROSES

Season 1906 — *Ready in June*

Pauline de Casteja (Tea). Brilliant pure red. Handsome buds, and flower of fine effect. **2s 6d**

William Notting (H.T.) Reverse of petals, coral red; inside, salmon rose; in the way of Madame Abel Chatenay, but bolder in flower and habit of growth, also brighter in colour. **2s 6d**

NEW ROSES for 1906—continued

Instituteur Sirdey. Buds yellow or reddish. Open flowers, pure ric golden yellow, large, full, of imbricated shape. Growth vigorous. **3s 6**

Betty. *Colour, ruddy gold, overspread with golden yellow.* Bloom are extremely large, fairly full and of fine form. Growth vigorous an erect; free branching habit. An exquisite rose; sweetly scented. **3s 6**

Countess of Derby. Blooms are large, perfectly symmetrical, wit highly pointed centre. Petals large, smooth, and shell shaped Colour, centre salmon; outer petals rose, passing to flesh veine peach as the flower expands. Very vigorous and erect growth; fre flowering, and deliciously perfumed. **3s 6d**

Lady Gay (Polyantha). Seedling from Crimson Rambler, which i resembles in habit. Flowers of good size; delicate cherry pink, fadin to soft white; borne on large trusses. A magnificent variety. **3s 6**

Baron Lade (H.T.) Colour, bright carmine. Flowers very large an full, and of perfect shape. **2s**

Henri Marrel (Tea). Long carmine yellow buds, opening golde yellow, shaded with copper and reflexed with rosy salmon. Larg and full; growth vigorous. **3s 6d**

Edmond Proust (Wichuriana). Coppery yellow, centre shade with carmine. **2s**

Mohrenkoenig (Tea scent.) Velvety crimson, shaded carmine. **2s 6d**

Debutante (Wichuriana). Large clusters of soft double pink flowers very fragrant; foliage and habit of growth distinct and elegant. **2s 6**

Reine Marguerite d'Italie (H.T.) Bright carmine; centre shade with vermilion; very large and full; of good form and habit. Flower produced continuously, and in great profusion. Growth vigorous. **2s 6**

Sweetheart (Wichuriana). Pale pink, changing to white as the flower expand. **2s 6d**

Baron von Pallandt (H.T). Vermilion, with bright red reflex; large very full; excellent shape and habit. Buds long, opening well. **3s 6**

Novelties in Roses of Last Season

Betty Berkeley (Tea scented.) Deep red, verging on crimson scarlet fine buds; produced on long firm stalks. **1s 6d**

Comtesse E. Guigne (Tea scented). Carmine, tinted crimson, copper centre. **1s 6d**

Comtesse O. de Logeril (Tea scented). Deep rose coloured buds, shaded salmon red. **1s 6d**

Commandant Felix Faure (H.P.) Rich lake, shaded black, flushed vermilion. **1s**

Dean Hole (H.T.) Silvery carmine, shaded salmon. **2s**

David Harum (H.T.) Peach pink; large. **1s 6d**

Dr. J. Campbell Hall (H.T). Coral rose, suffused with white. **1s 6d**

Duchess of Portland (H.T.) Pale yellow; a splendid rose. **1s**

Earl of Warwick (H.T.) Salmon pink, shd. vermilion in centre. **2s**

Frau Lila Rautenstraugh (H.T.) Coppery orange buds. **1s**

Fusion (Tea). Saffron yellow, centre a deeper shade. **1s**

Grossherzog von Oldenburg (H.T.) Deep red; handsome buds. **1s 6d**

Goldquelle (H.T.) Golden yellow; medium size. **1s 6d**

Gertrude (H.T.) A pale sport of Countess of Caledon. **1s 6d**

Georges Schwartz (Tea scented). Deep canary yellow. **1s**

Gladys Harkness (H.T.) Salmon pink; large and fragrant. **1s**

Gardenia (Wichuriana). Bright yellow variety. **1s**

Hugh Dickson (H.P.) Brilliant crimson, shaded scarlet. **1s 6d**

Hugh Watson (H.P.) Glowing crimson, shaded carmine. **1s 6d**

Irene (H.T.) Silvery white, at times faintly touched with pink. **1s 6d**

Irish Harmony (H.T.) Buds saffron yellow, splashed claret. **1s 6d**

Irish Engineer (H.T.) Brilliant scarlet. **1s 6d**

Lady Ashton (H.T.) Colour pale rose, shaded yellow. **1s 6d**

Ligne D'Arenburg (H.T.) Satin white; outer petals large. **1s.**

Mrs. David Mckee (H.T.) Creamy yellow; handsome foliage. **2s**

Mrs. A. Byass (Decorative Tea). Deep rose, shaded crimson. **1s 6d**

Madame C. P. Strassheim (Tea.) Yellowish, white in summer. **1s**

Mrs. Conway Jones (H.T.) Creamy white, flushed salmon pink. **2s**

Madame P. Olivoer (H.T.) Salmon, shaded rosy carmine. **1s**

Madame J. P. Soupert (H.T.) Almost white, or pale yellow. **1s 6d**

Marie Bulow (H.T.) Suffused carmine and yellow. **1s**

Mons. D' Arcice (H.T.) Rosy red; large and sweetly scented. **1s**

Petrus Donzel (Hybrid Chinese). Velvety crimson, tinted red. **1s 6d**

Perle des Neiges (Climbing Polyantha). Double; snow-white. **1s 6d**

Perle des Jaunes (Tea scented). Golden yellow; centre shaded copper. **1s 6d**

Rev. D. R. Williamson (H.T.) Crimson maroon; sweet-scented. **2s**

Rosamene Gravereaux (H.T.) Silvery white; reverse of petals pale rose. **1s**

Salmonea (H.T.) Bright crimson, with light salmon centre. **1s**

Una. Pale buff buds, changing to white. **1s**

New Fruits for Season 1906 and Recent Introductions

NEW APPLES—*First time offered*

Coffelt Beauty. Raised in Arkansas. Fruit roundish oblong; medium large; striped yellow and red; flesh greenish yellow, tender; flavour, mild sweet acid; quality very good; dessert; very late. **2s 6d**

Calville Blanche d'Hiver. Variety from Virginia. Fruit large; pale greenish yellow. A magnificent variety, but ripens late. **2s 6d**

Early Ripe. A Pennsylvania fruit; roundish-oblong; medium size; colour, pale yellow; flesh white, tender and juicy; sub-acid flavour; quality good. **2s 6d** each

Fishkill. From New York State. Fruit roundish oblate; size, medium to large; colour, creamy white, with bright blush; flesh white, very tender and juicy; sub-acid flavour; good. **2s 6d**

Green Sweet. Originated in Mass. Fruit roundish oblate, inclining to conical; medium size; green; flesh white, tender and juicy, and very sweet; very late; suitable for kitchen or market purposes. **2s 6d**

Lady Sweet. (True.) Raised in N.Y. Large, roundish-conical; yellowish green, striped red; flesh greenish white, tender, juicy, crisp and sweet; season very late; dessert or kitchen. **2s 6d**

Milden. Fruit large; oblong-conical; deep red stripes; flesh sub-acid; good dessert or kitchen; fairly late. **2s 6d**

Ontario. Canadian variety. Large, conical, yellowish-white, overspread and striped with deep red; flesh fine, tender and juicy, whitish-yellow, with sub-acid flavour; very late. **2s 6d**

Pride of Texas. Fruit medium size; roundish-conical; fine deep yellow colour; flesh sub-acid and good; very late winter. **2s 6d**

Palouse. Fruit medium to large; conical; pale yellow, striped and splashed flesh yellow, crisp. Described as one of the best mid-season apples. **2s 6d**

Shannon. Fruit large to very large; conical; pale yellow; flesh deep yellow, crisp and very juicy; flavour mild acid, sweet; good; mid-season. **2s 6d**

Sutton. Fruit medium to large; roundish-oblong; pale yellow, covered stripes red and crimson; flesh white, crisp, tender and juicy; sub-acid flavour. Highly recommended as a medium late dessert, kitchen or market variety. **2s 6d**

Walker Beauty. Very large; deep yellow, almost covered crimson; flavour sub-acid. Should be a valuable late variety. **2s 6d**

Yellow Forest. Medium size deep yellow; roundish; tender, juicy; sub-acid flavour. A good variety for dessert or cooking; ripening fairly late in season. **2s 6d**

APPLES—*Offered last season*

Gannon Grove. Suitable for warm districts. Deep orange, almost covered with stripes and blotches of rich vermilion. **1s 6d**

Early Harvest. Medium, round; bright straw colour; needs good cultivation. **1s 6d**

Huntsman. Large; yellow flesh; sub-acid; very good winter. **1s 6d**

York Imperial. Yellow, shaded red; flesh yellow, firm and juicy. **1s 6d**

Winkler. Medium, red, acid, good; long keeper. **1s 6d**

Jeneton (Rallo). Pale red, striped light yellow; flesh nearly white. **1s 6d**

Signe Tillisch. Fruit enormous size, very showy; good quality. **1s 6d**

Mo Pippin. Pale ground, striped red; flesh crisp. Keeps through winter. **1s 6d**

Santa Clara King. Yellow, covered with red on sunny side; ripens early. **1s 6d**

NEW CHERRIES—*First time offered*

Bigarreau Abel. Fruit large, heart shaped; black; flesh firm, juicy, highly flavoured. Late. **2s**

Bigarreau Elton. Specially selected as being one of the earliest and most profitable. Should ripen early in November. **2s**

Bigarreau M. Gaucher. Fruit large; nice red colour; heart shaped; firm, juicy, delicious; ripening late in season. Vigorous and prolific. **2s**

Fruhurst du Mark. Received from Continent of Europe, where it is described as one of the earliest. Medium size; dark red skin and flesh; very sweet; good market sort. **2s**

Pontiac. Fruit large; purplish black; late. One of the hardiest and best croppers in Wagga district. **2s**

CHERRIES—*Offered last season*

Precoce de Boppard. Earliest Cherry. Fruit dark glossy red, striped and spotted flesh; constant cropper. **1s 6d**

Bigarreau Pellisier. Beautiful large fruit; skin dark glossy red; flesh rosy, firm, and crisp; early. **1s 6d**

Guique Annonay. Fruit large, dark black; flesh firm; constant cropper. **1s 6d**

Roman Olirar. Dark glossy red; flesh firm and sweet. **1s 6d**

Noble. Very large, dark red; flesh firm, good flavour. Tree hardy and prolific. **2s**

NEW PEACHES—*First time offered*

Riverside Elberta. A seedling from the famous Elberta. Reputed to be a decided improvement on its parent, being a heavy and constant cropper. Fruit large, deep yellow and red, and a perfect freestone; ripe middle of January. **2s**

PEACHES—*Offered last season*

Bell's November. Earliest Peach in existence, ripening in November; partial slipstone. A great acquisition. **1s 6d**

Ruby Red. Clingstone; ripens early in January; heavy cropper. **1s 6d**

Admiral Dewey. Early yellow fleshed, freestone variety. **2s**

Edward VII. Remarkably early Peach; ripens early in November. **2s**

NEW NECTARINES—*First time offered*

Wilkinson's Free. Ripening in Baulkham Hills district early in December. Fruit resembles Lord Napier in colour, size and flavour, but ripens at least three weeks earlier. **2s**

Wilkinson's Cling. Another variety from the same raiser as foregoing, who speaks of it as earlier than Lady Carrington, better colour, and equally as heavy a cropper. **2s**

NECTARINES—*Offered last season*

Precoce de Croncels. Large; yellowish, with dark plum colour. **1s 6d**

Ice's Seedling. Fruit large, handsome, richly flavoured. **1s 6d**

Oldham Hill. Resembles Stanwick, but is twice its size and ripens later. **1s 6d**

NEW PEARS—*First time offered*

Packham's Late. Fruit fairly large; heavy cropper, and promises to rival Triumph. Stock this season very limited. **Price, 7s 6d; Dormant Bud, 5s**

Winter Bartlett. (True). All know the famed Williams Pear, and in the above we have a duplicate of the old favourite, but ripening at least three months later. No further recommendation is necessary. **2s 6d**

PEARS—*Offered last season*

Packham's Triumph. Worked on strong stocks, all buds having a perfect eye, and sure to grow. Prices—**5s** each; dormant bud, **3s** each

Beurre Lindauer. Large; flesh melting, sugary, and perfumed. **2s**

NEW PLUMS—*First time offered*

Gloire de Epinay. Fruit large; round; black red; flesh yellow, firm and melting. Tree extraordinarily prolific. **2s**

Reine Claude d'Althan. A very fine late red Plum; freestone; an excellent dessert; classed as a Gage. **2s**

October Green Gage. A decided improvement on the old Green Gage, being equally highly flavoured and luscious, at least twice its size, and earlier; does well in warm climates. **2s**

PLUMS—*Offered last season*

Akarana. Early Plum of vigorous growth; large size; firm. **1s 6d**

Lincoln. Fruit very large; deep reddish purple; heavy cropper. **1s 6d**

Maynard. Deep purplish crimson, thin blue bloom; flesh light yellow, marbled with red; firm, delicious; highly flavoured. **5s** each, and in dormant bud **2s** each.

Reine Claude Tardire de Chambourcy. Size and aspect of Green Gage; tree very vigorous; prolific. **1s 6d**

PRUNES—*Offered last season*

Imperial Prune. Large; ripens early; thin skin. **2s**

Sugar. Fruit even in size, large; rich in sugar, hence its name. Stock limited. **1s 6d**

Pearl. White, semi-transparent, with a heavy bloom. **1s 6d**

NEW ORANGES—*First time offered*

Golden Nugget Navel. From California: there considered superior to Washington Navel. Fruit smooth, solid and thin skinned; of fine texture; colour, strong gold. Tree is a regular and even cropper. **5s**

Buckeye Navel. Improved Washington Navel, from same source as foregoing. A true Navel Orange in every way; ripening early in season; distinct and delicious flavour; good cropper. **5s**

The Navelencia. As its name implies, is a cross between the popular Valencia and Washington Navel. Retains the good qualities of Washington, together with hardiness and lateness of Valencia, and is reported to ripen from 30 to 60 days later than Washington. This should be a valuable variety to Citrus growers. **5s**

Thompson's Improved Navel. Reputed to be a distinct improvement on Washington Navel; is earlier, and a good even consistent cropper. **3s**

Ellendale Beauty Mandarin. Improved Beauty of Glen Retreat; is not liable to split in wet weather. Being a colonial raised variety it should be valuable. **2s 6d**

Jacob's Improved Thorny Mandarin. Is reported to be a distinct improvement on old Thorny, being much larger and earlier, and does not split in wet weather. **2s 6d**

Fewtrell's Early Shipping. A cross between an Orange and Mandarin, being practically the largest Mandarin in cultivation. Fruit ripens very early, and is a good carrier. **2s 6d**

NEW ALMOND—*First time offered*

Riverside Peerless. A variety of Australian origin; fairly vigorous. Nut resembles Brandes Jordan, but is a trifle larger, and far more highly flavoured; husk soft. **2s**

ALMOND—*Offered last season*

Princess. Large, richly-flavoured kernels; much later than other varieties. **1s 6d**

NEW STRAWBERRIES—*First time offered*

Aurie. A Queensland variety coming on to Sydney market early in August; a heavy and constant cropper, and resists drought. Fruit above medium; beautiful glossy scarlet; flavour good. Stock limited. **2s 6d** doz.; **15s** per 100.

Annetta. Another Queenslund seedling that promises to eclipse anything we have in the way of early berries. Fruit large, 10 or 16 to the quart; bright shining red: of delicious flavour; in shape somewhat square without the Marguerite point. Seen in Sydney market early in spring; withstand frosts and droughts. **10s** 100; **1s 6d** doz.

King Edward VII. Result of systematic hybridising of Royal Sovereign, and raiser claims to have produced a far superior fruit. Berries extra large; deep vermilion; produced in bunches well clear of ground. A heavy and constant cropper, bearing from September to May: in fact, it is almost an all the year round Strawberry. Flesh pure white; delicious pineapple flavour. Cannot be too highly recommended. Price: **2s** per doz; **12s 6d** per 100.

STRAWBERRIES—*Offered last season*

Uptut Mark. Medium sized, bright red; in fruit from November to May. **10s** per 100.

Governor-General. Highly coloured; bearing well into winter. **8s** per 100.

The Marshall. Magnificent berry; very large; deep crimson. **8s** per 100; **2s** doz.

NEW BLACKBERRY—*First time offered*

White Crystal. Clear golden yellow form of Blackberry. Fruit large; seeds small; ripening early in season. **1s 6d**

BLACKBERRY—*Offered last season*

Mammoth. Magnificent clusters of dark red berries; luscious flavour. **1s 6d** each.

New Grasses of Proved Merit

Rhodes Grass

Roots, 2s 6d per 100; 20s per 1000.

Trial packets, 1s each. Special quotations for pound lots.

DURING the past season we have distributed a large number of trial packets of this Seed, and the reports of its great merit as a magnificent fodder grass point to its extensive cultivation during 1906. It is essentially a warm weather grass, luxuriating apparently in the warm districts. It gives abundance of summer feed in the colder parts, but makes little growth in the winter. The paddock illustrated was planted from seed sown end of April, 1905, and plants put out in September, 5 feet apart, and early in February (10 months from sowing), were 4 feet high, and again in seed; for grazing or cutting it would be ready end of December. Stock of every kind are very fond of this grass and eat it greedily. When cut at the proper time it makes excellent hay. It is drought-resistant, and roots at every joint, spreading rapidly. Experience shows it to be one of the most valuable grasses ever introduced into Australia.

Paspalum Virgatum

1s per packet

ONE of the same family as the now famous Paspalum Dilatatum, but is in marked contrast to it, as P. Virgatum does well in poor dry land; is essentially a hay grass, and is a great drought resister; also stands frost well, and is relished by stock. Can be propagated by roots, divisions, or from seed.

Texas Blue Grass *(Poa Arachnifera)*

THIS grand grass is not in large demand, but deserves to be more generally cultivated. It is a perennial of creeping habit, and is remarkable for its drought-resisting qualities. It is a valuable addition to pasture mixtures. Sow in autumn and spring when ground is in a good condition. **Packets 1s each.**

This photo of ***Rhodes Grass*** *was taken during the last few weeks, and shows the seed being gathered from a paddock planted in Sept. (now,—Feb.), 4 ft. high.*

The Latest Scientific Discovery—Manure for an Acre of Land in a Medicine Bottle!

Application & Use very easy

1. Dilute with equal quantity of water and sprinkle the seed, stirring well till seed is thoroughly moistened, **not wet.**
2. Spread seed out in a clean place, **but not in Sunlight,** till dry.
3. If seed cannot be sown quickly, it must be thoroughly dried to prevent heating.
4. This culture will remain good for one month from date stamped on bottle.

CAUTION—Keep the bottle away from Sunlight.

To ensure success the above directions must be carefully attended to.

The soil must not be deficient in other plant foods, *i.e.*, Phosphates or Potash. It is essential that good seed be used, and proper cultivation be attended to.

NITRO CULTURE

In Liquid Form

Messrs. ANDERSON & CO., Seed Merchants

399 GEORGE STREET, SYDNEY

Have been appointed Sole Agents for these Cultures, manufactured by the A. & P. Food Co. Ltd., New Zealand

Illustrated Pamphlets and full details on application.

Anderson & Co. Seeds for all Crops

399 George Street, Sydney

Enough to Inoculate Half-Acre	6/-
Enough to Inoculate One Acre	10/-

NOTE.—Please state distinctly if you require the Culture for Peas, Beans, Red Clover or Alsike, as the Culture for one plant is not effective for either of the others.

CASH MUST ACCOMPANY ALL ORDERS, which can be booked in advance to avoid disappointment. When ordering, please state date you intend to sow your land, as the Cultures will be sent direct—POSTAGE PAID—in all cases to prevent delay, with full directions for use enclosed.

Anderson & Co., Seedsmen and Plant Merchants, Sydney

Tobacco
(Nicotiana Virginica)

Virginian · Florida · Broad Leaved Dutch
Kentucky · Havana · Big Frederick
Maryland · Gold Leaf · Connecticut

2s per oz.

CULTURE. The Tobacco plant requires a great amount of care during its growth, and much depends on the soil and situation selected for it; a sandy loam suits it best. Sow in a seed bed in a sheltered position, during July and August, plant out when strong enough in October. One ounce will produce sufficient plants for an acre.

Teosinte
(Euchlæna Luxurians)

6d per pkt.; **5s** per lb.

CULTURE. A tropical plant; only the warmer districts of this State and Queensland are suitable to its cultivation. Under favourable conditions yields an enormous weight of forage. When it has reached a height of 3 or 4 feet it gives 3 or 4 cuttings for fodder; if allowed to grow 12 feet, cattle will only eat the tops. Sow October and November.

Tagosaste
(Cytissus proliferous)

3s per lb.

A HARD wooded shrub, sometimes called "Tree Lucerne," and used as a forage plant; bees are fond of its flowers.

CULTURE. Sow in autumn and spring on sandy poor land, and thin out the plants to 10 or 13 feet apart.

Dwarf Essex Sowing Rape

4d lb. **28s** cwt.

SPECIAL PRICE FOR LARGE LOTS

One of the best rotation crops for the Australian farmer. As an autumn crop for sheep it is excellent, and in Australia it might be made a winter crop in all the coastal districts. It is very nutritious, much relished by sheep, yields enormously, and cannot be too highly recommended. Broadcast, from 5 to 7 lbs. is used per acre. Rape can also be grown for green manure, and ploughed under as soon as the plants have made a strong growth and become well rooted. For sheep feed the seed should be drilled the same as for turnips; sow 3 to 4 lbs. per acre, thin the young plants like turnips, and cultivate the crop in a similar manner. Sheep must not be turned in until the crop is full grown.

Tares or Vetches

Large Black Golden — Prices and Samples on application.

CULTURE. Valuable either for hay or green fodder. Sow in March, April and May, with barley or rye. It is also a good crop for ploughing in as green manure. Both varieties may be sown broadcast, at the rate of a bushel or a bushel and a-half to the acre, and half or a whole bushel of rye or barley may be sown with them; the latter keeps the tares off the ground, and helps to produce a better and a heavier crop.

Sorghums and Millets

For Green Fodder

Prices fluctuate very much. Quotations and Samples on application.

Most useful forage plants; produces enormous crops on any well-worked, average soil.

Early Amber Cane. Very early.
Sorg. Saccharatum (blk. seed). Branching habit, a favourite
Planter's Friend (brown seed). Wonderfully productive.
Kaffir Corn (Sorg. Tartaricum). White seeded; for fowl feed.

Nominal Price, **4d** to **6d** lb. Quotations on application.

Hungarian Millet. Excellent for green fodder and hay. 10 lbs. per acre in drills. **4d** per lb., **28s** per cwt. Special prices on application.
White French. Makes very valuable feed, and good hay.
Pearl Millet (Pencilaria Spicata). **1s 6d** per lb.
Broom Millet (White Italian). Valuable only for broom making.
Japanese Millet. One of the finest fodder plants, of rapid growth and yielding large quantities of green fodder. Drought resisting. **1s** lb.

CULTURE. The land should be deeply ploughed, harrowed, and rolled, and lightly harrowed a second time before drilling. Sow seed in drills 3 feet apart; Sorghum at the rate of about a peck per acre; Millets rather less. September, October, November and December are the best months for sowing.

Johnson Grass or Evergreen Millet
(Sorghum halepense).

1s per lb.

Special quotations for large parcels.

If once introduced almost impossible to eradicate; therefore don't sow near the garden or cultivated paddocks.

CULTURE. One of the best fodder plants we have for poor land, and is sown largely on the poorer pasture lands, where it has proved invaluable during periods of drought, yielding a large amount of fodder. Sow and cover lightly 10 to 15 lbs. per acre. Sow during spring; it will not stand frost.

Lucerne
(Medicago Sativa) N.S.W. Grown Seed

9d per lb. retail

The most important FORAGE PLANT of New South Wales

EVERY station or home farm should have its Lucerne paddock; and if the small selector is wise, he will make this one of his first cares—to sow a small paddock of this invaluable crop on the best land he has, being careful that the soil is thoroughly well worked. Lucerne can be used either as a green crop or as hay, and all stock thrive well upon it. The land intended for it must be well and deeply tilled—any well worked average land will produce fine crops. Sow, in drills, about 10 lbs., and broadcast about 15 lbs. of seed to the acre. The best time for sowing, under ordinary circumstance, is autumn; but spring sowing is also successfully practised by large growers. March and April are good months.

SPECIAL QUOTATIONS AND SAMPLES FOR LARGE LOTS.

Selected Seed Maize

IT is difficult to fix the prices of Seed Maize, and we only give a list of the varieties we shall probably have for sale during the season, samples and prices of which we shall send on application. When possible the Maizes will be "topped and tailed," but they will be as per samples offered.

Anderson's Golden King. One of the finest Maizes grown.
White Ninety-Day (or Hickory King). Yields well.
Clarence River Early. A very fine Maize.
King's Early. This is a good early variety of dwarf habit.
Ninety-Day. (For Green Fodder)
Large Yellow Moruya.
Red Hogan.
And other varieties

SPECIAL QUOTATIONS for large lots.

CULTURE. A fine, rich soil is the very best for a Maize crop. The land should be ploughed deeply, rolled, and a light harrow should be passed over it before planting. Sow 15 to 16 lbs. for seed crop in drills 3 ft. to 4 ft. 6 in. apart. For a green crop sow broadcast—say a bushel per acre, or ½-bushel in drills. Nine-Day is best for that purpose.

Anderson's Lawn Grass Seeds

1s 6d per lb.; **25s** per bushel of **20** lbs.

FOR MAKING NEW AND RENOVATING OLD LAWNS, TENNIS GROUNDS, &c.

WE can confidently recommend this mixture as being free from weeds and coarse grasses, and such as will give great satisfaction and produce a fine sward; but as this mixture is exclusively made up of English grasses, it is more particularly suitable to the cooler regions of the State, where it will be grown to most advantage.

LAWNS OF COUCH GRASS. IN the warm districts of our State there can be no doubt that Couch is the hardiest and most reliable grass for a lawn or bowling green, and it can be provided either by turfing or by chopping up the roots into short pieces of about two to three inches, and planting them in rows about six inches apart, covering them right over. A green velvet carpet can also be produced with Couch Grass, from seed if sown at the proper season, at the rate of about 10 to 15 lbs. per acre. Sow August, September or October. **1s 6d** lb.

Australian Salt Bush Seeds and Native Grasses

HOW TO SOW SALT BUSH SEEDS.—The best time to sow Salt Bush seeds is in early spring or early autumn, when the ground is moist. Under such conditions the seed will germinate quickly. The seed should be sown in patches—about half-a-dozen seeds together—at distances of about 30 yards for the tall-growing kinds, and 5 yards for the dwarf-growing sorts, and from half-an-inch to an inch deep. If the soil is of a strong tenacious character, the seeds should be covered with some light decayed vegetable matter. The seed can be put in with the aid of a light hoe. It is not necessary to plough the land preparatory to sowing.

Round-leaved or Old Man Salt Bush (Atriplex Nummularia)

3s per lb.

This Atriplex attains a height of 6 to 10 or more feet. The leaves are variable, but are mostly round, rather thick.

Blue Grass (Andropogon Sericeus)

5s 6d per lb.

A splendid and valuable pasture grass, and makes considerable growth during the winter months, and is thus doubly valuable to the grazier. During the summer months it yields an amount of rich, leafy, bottom herbage, of which sheep are particularly fond, and fatten well on it. It will stand close feeding, and makes capital hay.

Creeping Salt Bush (Atriplex Semibaccata)

4s per lb.

This is a procumbent or prostrate perennial plant, with herbaceous stems, spreading from 1½ to 2 or more feet. The whole plant is pale green, though sometimes it is nearly white. It is a most valuable plant for sheep; they eat it with avidity, and thrive remarkably well on it. Single plants are said to have covered a diameter of 16 feet in one season.

Slender-fruited Salt Bush (Atriplex Leptocarpa)

3s per lb.

The drought-enduring qualities of this fine Salt Bush are truly remarkable. Sheep are particularly fond of this plant, and eat it right down to the ground. Leaves are variable, mostly oblong, 1 to 2 inches in length.

Halimus-like Salt Bush (Atriplex Halimoides)

3s lb.

A dwarf bush. The whole bush has a glaucous or whitish appearance. Its leaves are variable. Both sheep and cattle thrive well on this plant.

All-fruited Salt Bush (Atriplex Holocarpa)

4s per lb.

It produces rich succulent herbage, of which sheep are extremely fond. It is a mos valuable fodder plant, and patches or paddocks of it should be conserved.

Mitchell Grass (Wheat-like) (Astrebla Triticoides)

5s per lb.

This grand perennial grass is found on rich soil all over the interior, but nowhere in large quantity. Under good cultivation it yields a very large amount of rich, succulent herbage, stock being very fond of it. It is said cattle will fatten on its dry broken stems and leaves.

(For descriptions, etc., we are indebted to "Australian Grasses," and "Fodder Plants of Australia," by Fred. Turner, F.L.S., F.R.H.S., &c.)

Our Permanent Pasture Grasses

Hints on the Sowing & Cultivation of Grass Paddocks

What Seeds to Sow. The selection of grass seeds of a permanent character is an all-important matter; such seeds can only be obtained from old pastures.

Preparing the Land for Sowing. We can say generally that the better the land is worked the more satisfactory will be the results. You cannot plough the land too deep before sowing grass seed; cross ploughing will also much improve it, and a rough harrow passed over the land before sowing will be desirable.

Sowing the Seed is a simple matter; about 40 lbs. mixed seed (equal to 2 bushels) will be sufficient for an acre, and these should be sown broadcast; a roller or light harrow should be run over the ground, and this will be all that is necessary to cover the seed.

Time of Sowing. We strongly recommend autumn sowing, and March and April as the best months, but later sowings can be made in many districts. August and September are the best spring months.

Do not Sow with a Green Crop. This method is practised in England, but is not suitable for New South Wales, as the climatic conditions are altogether different; however, it is a capital plan to **sow a green crop first on newly cleared land,** as there is sure to be a great deal of weed seeds in the soil, which will come up with the first crop and be killed by the second ploughing, leaving the land clean for the reception of the grass seeds to follow.

Pasture Grasses. Our customers must not expect that Imported English Grasses can be grown successfully in every part of the State, but where the land is rich, and where irrigation can be applied, and in the cooler districts they will do well.

Manures for Grass Lands. We advise the use of artificial manures, because they contain all the fertilizing qualities of stable and cow manure, and also much that these do not possess, and also because they do not contain weed seeds, which all stable, and particularly cow manure, does in very large quantities.

Permanent Pasture Grass Seed Mixtures

For the Warmer Districts

Mixture A		Mixture B	
5 lbs.	Cocksfoot Grass	20 lbs.	Prairie Grass

SELECTED FOR OUR OWN TRADE AND SPECIALLY MACHINE DRESSED

Permanent Pasture ... Grasses & Clovers

Prices will be adhered to as far as possible, but they are liable to fluctuation of the market.

Prairie Grass (Bromus unioloides). (Scarce this season). **6s 6d** to **7s** bus.
In rich land it will produce very heavy crops of the richest forage, and will afford five or six cuttings in the year. As a pasture grass it is first-class, being even richer in nutritious properties than the much-valued Perennial Rye Grass.

Perennial Rye Grass (Lolium perenne) **5s** to **6s** per bushel
An excellent pasture grass. Possesses most nutritious qualities, and is relished by all kinds of stock. It bears depasturing well, and will succeed in any average soil. In the cooler districts of the State it thrives admirably, and yields surprising results. Two bushels will sow an acre.

Poverty Bay Perennial Rye Grass **7s 6d** per bushel
This is undoubtedly the best variety of this fine grass so suitable for the cooler districts.

Cocksfoot Grass (Dactylis glomerata) **10s** per bushel
Produces heavy crops of feed, which is greedily eaten by all kinds of stock; can be either depastured or cut for hay; grows rapidly after being cut or grazed, and will flourish on a variety of soils and situations.

Couch Grass (Cynodon dactylon) **1s 6d** per lb.
Bermuda Grass of America — Sow 10 lbs. per acre — **Special prices for large lots**
Doob Grass of India
In dry seasons this grass is invaluable. It is esteemed as a pasture grass for its nutritious and flesh-forming properties. It will grow during the hot months of summer, and start into fresh green growth after rain.

Italian Rye Grass (Lolium Italicum) **5s 6d** per bushel
On rich, moist soil it will yield three or four heavy cuttings in a year. It is only a biennial, however, and not suitable for permanent pasture. Two bushels will sow an acre.

Crested Dogstail (Cynosurus Cristatus) **1s 9d** per lb.
A valuable grass for sheep pastures.

Sweet Scented Vernal Grass (Anthoxanthum odoratum) **1s** lb.
This perennial grass is liked on account of the perfume it imparts to meadow hay.

Meadow Foxtail (Alopecurus Pratensis) **1s 6d** per lb.
One of the earliest and best pasture grasses. Valuable for grazing purposes. Should only be used in permanent pasture mixtures.

Timothy (Phleum Pratense) **9d** per lb.
A very productive and nutritious grass suitable for hay and green fodder.

Buffalo Grass (Stentaphrum Americanum)
Roots only can be supplied, and should be planted about 1 to 2 feet apart. Roots, enough to plant 30 feet square, 1 foot apart, 5s. Larger quantities at proportionate rates.

Rib Grass (Plantago Lanceolata) **6d** per lb.
Rib Grass yields an enormous amount of rich herbage. Sow with other grasses 2 or 3 lbs. to the acre, or 20 lbs. if alone.

Smoothed-Stalked Meadow Grass (Poa Pratensis) **1s** per lb.
Kentucky Blue Grass. A good pasture grass. It forms a thick turf. Should form a portion of all pasture grass mixtures; one of the very best herbage grasses grown.

Wood Meadow Grass (Poa Nemoralis) **1s 9d** per lb.
Very nutritious, desirable grass for pasture mixtures.

Rough Stalked Meadow Grass (Poa Trivialis) **1s 9d** per lb.
Suitable for pastures, and much relished by stock.

Evergreen Meadow Grass (Poa Sempervirens) **1s 9d** per lb.
Stands drought well, and is one of the most valuable of the Poas.

Sheep's Fescue (Festuca Ovina) **9d** per lb.
A very hardy pasture grass, is relished by stock.

Meadow Fescue (Festuca Pratensis) **9d** per lb.
A valuable grass for permanent pasture.

Hard Fescue (Festuca Duriuscula) **9d** per lb.
A good pasture grass for soil of a sandy or light nature. Productive and nutritious

Red or Creeping Fescue (Festuca Rubra) **1s** per lb.
A desirable grass for binding loose sandy soils, or light soils liable to occasional floods

Paspalum Dilatatum **1s** per lb; **special price for large lots.**
The Great Dairying Grass **Finest Strong Growing Seed.**
This grass has proved a great success in the Northern River districts, and is particularly suitable for pasturing dairy cattle. A good winter grass and stands dry, hot weather admirably, yields a large quantity of herbage, and will soon spread, as it seeds freely. Sow 2 lbs. per acre with other grasses, or 6 lbs. alone. Sow in spring and early summer.
Roots can be planted nearly all the year round, but the very best time is early in spring and right through the summer until April. Strong young plants at **9s** per 1000, or **2s** per 100. The number for planting 1 acre is 1750 to 1800—5 feet apart

Red Top Grass (Tricholaena Rosea) **3s 6d** per lb.
This is a splendid heavy cropping grass, making splendid hay or chaff, and growing to a height of three feet. It stands drought well. Sow in spring 2 lbs. to 3 lbs. per acre mixed with other grasses; 12 lbs. if sown alone.

Bromus Inermis **1s** per lb.
This is one of the finest Fodder Grasses in cultivation. It yields large crops of rich, succulent feed, and stands drought well. Sow in spring; 25 lbs. to the acre broadcast. It will stand for years, and can be cut for a hay crop.

Perennial Red Clover or Cow Grass (Trifolium Pratense) **1s 3d** lb.
This is the grand old Red Clover of the English meadows, which is relished by all stock, has splendid fattening qualities, and should be in every pasture mixture.

Scarlet Clover (Trifolium Incarnatum) **9d** per lb.
Large yield, quick growth, and relished by all kinds of stock. Sow 20 lbs. per acre.

White Clover (Trifolium Repens) **1s 6d** lb.; parcel of 20 lbs. **1s 3d** lb.
Valuable in pastures, either for dairying or fattening. Sow February to May; 2 to 4 lbs. will be sufficient for an acre if mixed with grasses.

Alsike Clover (Trifolium Hybridum) **1s** per lb.
Heavy yielding and excellent Clover, but requires a moist situation.

Trefoil or Yellow Clover **9d** per lb.
A hardy Clover for sheep pasture, and very useful in the colder districts.

Native Trefoil (Medicago Obicularis) **1s** per lb.
Produces in good seasons a large amount of feed. Sheep are very fond of this plant.

Strawberry Clover (Trifolium Fragiferum) In the husk, **7s 6d** lb.
A fine Clover for low lying lands and has great fattening qualities. It is of a trailing habit and quite different in appearance to all other Clovers. It is somewhat largely grown in Victoria and is highly spoken of.

Australian Hardwood and other Timber Tree Seeds

EUCALYPTI

HEDGE SEEDS, WATTLES, &c.

African Box Thorn (Lycium Horridum). Very hardy; shoots are armed with strong thorns; plants bear clipping well. Sow in spring, and plant out the rows during the winter. — 1s per oz.; 10s per lb.

Cape Broom (Aspalanthus Sp.) A dwarf, furze-like bush, with pretty pea-like flowers. — 6s per lb.

Osage Orange (Maclura Aurantiaca) A deciduous sbrub, bearing short sharp thorns and bright green leaves. Height 12 feet. Not suitable for small gardens. — 6s per lb.

Acacia Decurrens (Black or Green Wattle) — 2s 6d lb.

Acacia Pycnantha (Golden Wattle) — 1s 6d per lb.

Acacia Spectabilis A highly ornamental variety. — 6d per pkt.

Acacia Dealbata (Silver-leaved Wattle) A very ornamental variety. — 8s per lb.

Acacia Baileyana The well-known Cootamundra Wattle. — 8s per lb.

For the Colder Districts take January Calendar as a guide for February sowing; February Calendar for March, and so on right through the year.

Our Farm Calendar for New South Wales

Particulars as to cultivation of the various plants will be found on the previous pages.

JANUARY

Sow Anderson's Imperial Swede and other Field Turnips, Field Cabbage, Buckwheat for Green Crop, Johnson Grass (late sowing), Rape for autumn sheep feed, Soja Beans for green fodder (late sowing), Maize for grain crop, and Thousand Headed Kale (late sowing).

FEBRUARY

Sow Anderson's Imperial Swede and other Field Turnips, Carrot (when September sowing has failed), Field Cabbage (late sowing), Rape for autumn sheep feed, Buckwheat, Cape and Skinless Barley for green fodder, Maize for green crop, Parsnip as field crop, and Thousand Headed Kale (late sowing).

MARCH

Sow Rape for sheep feed, Broad-Leaved Lucerne, Rye Grass, Prairie Grass, and Cocksfoot Grass and Clovers for pasture, Burnett Grass and Sainfoin for green fodder, Buckwheat (last month to sow), Black or Golden Tares alone or mixed with Oats, Barley or Rye; sow Oats, Cape and Skinless Barley, Rye and Scarlet Clover separately for green crop; Carrot (if September sowing has failed).

APRIL

Sow for main crops, Horse Beans, Field Peas, Rape, Black and Golden Tares for green fodder (alone or mixed with Oats, Barley or Rye), Broad-Leaved Lucerne, Cocksfoot, Prairie and Rye Grass, and Clovers for permanent pasture, Burnett Grass, Sainfoin, Wheat for grain and hay, Oats for grain and green crop, Cape and Skinless Barley and Scarlet Clover for green crops, Rye for grain and green fodder.

MAY

Sow for late crop, Field Beans, Peas, Rape for winter feed; Black and Golden Tares for green fodder sown separately or mixed with Oats, Barley, or Rye, Broad-leaved Lucerne, Rye Grass, Prairie Grass, and Cocksfoot Grass. Clovers for permanent pasture; Wheat for grain and hay, Oats for grain and green crop, Barley (Cape and English) for grain, Cape and Skinless Barley for green crop, Rye for grain and green fodder, Scarlet Clover for green crop, Onions (broadcast or in drills).

JUNE

Sow for late crop, Field Beans, Peas. Field Cabbage to be transplanted August and September; also Field Peas, Rape, Wheat for grain and hay, Oats for grain and green crop, Barley (English, Cape and Skinless) for grain or green crop, Rye for grain and green crop, Onions (broadcast or in drills).

JULY

Sow Onions (broadcast or in drills), Rape, Wheat for grain and hay, Oats for late crop and green stuff (late districts), Barley (Cape, English and Skinless) for grain or green crop; Tobacco in seed bed, planting out in October; Potatoes (see special list).

AUGUST

Sow Chicory, Field Pumpkin, Onions (broadcast or in drills) in the colder districts; Grass Seed and Clovers and Broad-leaved Lucerne, if favourable season; Oats for green fodder (late districts), Barley (Cape, Skinless and English) for grain, Rye for green stuff, plant Potatoes (offered in special list), Sugar Beet, Sunflower and Mangel.

SEPTEMBER

Sow Buckwheat end of month, Field Carrot, Cattle Melon, and Chicory; for green fodder, Johnson Grass, Amber Cane, Planters' Friend, Sorghum and Hungarian Millet; Maize for seed crop and green fodder; Field Pumpkin, Mangel, Sugar Beet, Sunflower, Cocksfoot, Ryegrass and Prairie Grass and Clovers, and Broad-leaved Lucerne, if favourable season; also Couch Grass, Potatoes (offered in special list); Cow Pea for green crop or manure.

OCTOBER

BEST month to sow Amber Cane, Planters' Friend, Sorghum, Pearl Millet, Broom Millet, Johnson Grass, Hungarian Millet, Maize, and Buckwheat, all for green fodder; Broad-leaved Lucerne (if favourable season), and Couch Grass; Soja Beans, Teosinte, Sunflower seed for poultry feed; Cow Pea.

NOVEMBER

Sow for green stuff, Buckwheat, Amber Cane, Planters' Friend, Sorghum, Johnson Grass, Hungarian Millet, Pearl Millet; Maize for seed crop and green fodder, Pie Melon, Field Pumpkin, Soja Beans, Teosinte, Sunflower for poultry feed, Cow Peas for green crop and green manuring.

DECEMBER

Sow for green fodder, Buckwheat, Amber Cane, Planters' Friend, Sorghum, Broom Millet, Johnson Grass and Hungarian Millet, Maize for seed crop and green fodder, Soja Beans for green crop.

Sow Anderson's Purple-Top Swede, one of the best of our root crops.

FRUIT TREES

Our Select List for Season 1906

"I received the Fruit Trees and they are undoubtedly a splendid lot, and were very carefully packed. Whatever orders I require I will send to you for them." —P. J. Pegg, *Junee Junction.* 29-8-05.

"I am pleased to tell you that the Trees and Vines arrived in good order. They are fine healthy plants, and I am well pleased with them. Many thanks for promptitude."—F. S. Golledge, *Tenterfield.* 12-7-05.

When Selecting Fruit Trees

Medium sized trees, with plenty of fibrous roots, are much superior to old overgrown trees. If fruit is grown for sale, have a larger number of trees of a few approved good sorts, in preference to a large variety in small lots. Customers who have no knowledge of the best market varieties should leave the selection to us.

Fruit Trees may be Ordered by NUMBER ONLY, but please be particular in sending DATE OF CATALOGUE

Apples

1s 3d single tree
12s per dozen
90s per hundred.

457 **Trollope's Victoria.** One of the best.
458 **White Chilian or Hautbois.** **10s** per 100

Newly Introduced, Hardy, Drought-resisting Strawberries

459 **Dr. Moree.** Raiser's description: A splendid berry of the Creswell type, but larger, better flavoured, and a heavier cropper. Last spring I counted over two hundred formed berries (not counting blossoms) on one plant, and this same plant has fruited continuously ever since, and now (March) has a good show of blossoms, green and ripe fruit. This is not an exceptional case, but simply one of many plants in the bed that I marked for identification. **8s** 100
460 **Howcroft.** Raiser's description: A large fruiting berry of the same type as Dr. Moree, stands dry weather slightly better, and in dry positions can be recommended in preference to that variety, but in fairly moist situations or in good seasons, Dr. Moree would be preferable. **8s** 100
461 **Sir Harry Rawson.** Raiser's description: This is without exception the best flavoured strawberry I know of; a very good spring fruiter of the Marguerite type; large and attractive, besides being one of the best of carriers. My aim in this instance was to produce the most attractive and best flavoured strawberry for market purposes, and all who have seen Sir Harry Rawson admit that I have succeeded **8s** 100
462 **Federation.** Specially brought under our notice by a large Queensland grower, where it has cropped very heavily and regularly throughout the recent droughts. In that State (Queensland) it is considered by far the most profitable berry, and we have every confidence in bringing it under the notice of growers and private gardeners **2s** doz.; **10s** 100
463 **The Marshall.** A splendid variety, bearing large and regular crops right through from September to July; in fact, this can be safely termed the "king of winter strawberries"; berries are very large, deep crimson, borne in clusters clear of the soil; it has a superb leaf, which acts as a natural shade from sun's rays in November and December; a great acquisition to strawberry growers.
2s doz.; **10s** 100

Oranges, Mandarins, and Lemons

1s 6d single tree
15s per dozen
100s per hundred. Packing free. 50 at 100 rate
} Packing charges, 1s per doz. for long journeys

Grape Vines

6d per single vine
30s per hundred
} Except where otherwise marked.

Special Quotations for Large Quantities.

EUROPEAN VARIETIES. Strong Well-Rooted Plants.

544 **Barbarossa.** Purple, tapering bunches.
545 **Black Frontignan.** Bunches medium size.
546 **Black Alicant.** Very prolific, medium size.
547 **Black Hamburg.** Most useful grape.
548 **Black Muscat of Alexandria or Snow's Black Muscat.** Splendid, delicious.
549 **Black Monukka.** Table grape, seedless.
550 **Black Prince.** Large, juicy, good flavour.
551 **Black Mammoth.** Late and large.
552 **Bowood Muscat.**
553 **Buckland's Sweetwater.** Hardy, early.
554 **Camden Sherry.** Fine grape, amber.
555 **Centennial.** Berries large, amber. 1s each
556 **Champion Muscat.** Juicy, muscat flavour. 1s each
557 **Chasselas.** Greenish yellow; early.
558 **Chasselas Rose.** Yellow, changing to rose.
559 **Chasselas Vibert.** Amber colour; juicy.
560 **Crystal.** Berry large and round, pale amber.
561 **Doradillo.** Hardy and prolific; rich amber.
562 **Emperor.** Fruit purple, firm. 1s each
563 **Gordo Blanco.** White muscat.
564 **Golden Champion.** Yellowish, delicious.
565 **Green's Early.** Skin greenish white.
566 **Green Gascoigne.** Free bearing.
567 **Golden Hambro'.** Deep amber colour grape.
568 **Gros Guilliame.** Black; rich flavour.
569 **Gros Colman.** A valuable market variety.
570 **Lady Downe's Seedling.** Large, rich, black.
571 **Lady's Finger.** Very delicious.
572 **Lady Hampden.** Supply limited.
573 **Madresfield Court.** Muscat flavour; black.
574 **Malaga.** Late; black.
575 **Mrs. Hall's Perfection.** Supply limited.
576 **Mrs. Pearson's Golden Queen.** Luscious.
577 **Mrs. Prince's Black Muscat.** Fine muscat flavour; large berries and bunches. 1s each
578 **Mudgee Black Sherry.** Large bunches. 1s each
579 **Muscat of Alexandria.** Pale amber.
580 **Red Hanneport.** Heavy cropper. 1s each
581 **Red Prince.** Warm sheltered situation.
582 **Royal Ascot.** Bunches medium size; early.
583 **Shepherd's Reisling.** Good table or wine.
584 **Sultana.** Medium size; for Raisin making.
585 **Sweetwater.** Golden colour; very juicy.
586 **Syrian.** Immense bunches and berries.
587 **Thompson's Seedless.** Resembles Sultana. 1s each
588 **Trentham Black.** Melting flesh, rich.
589 **Ulliade.** Very fertile; excellent table grape.
590 **Waltham Cross.** Pale amber; good.
591 **Wantage.** Bunches large, pale red; hardy.
592 **Wax.** Amber coloured; fine flavour.
593 **Wortley Hall.** Deep purple colour; late.
594 **Zante.** The Currant of Commerce; seedless.

AMERICAN VARIETIES.

595 **Anna.** Pink, bunch and berry large; sweet.
596 **Bell's Seedling.** Excellent variety of Isabella.
597 **Catawba.** Purple berries, juicy, rich.
598 **Diana.** Bunch and berry large, sweet.
599 **Isabella.** Makes a good wine or jelly.
600 **Wilder.** Bunch and berry large and round.

Grape Vines

On Phylloxera-proof Stocks

1s single vine; **10s** doz.; **75s** hundred, except where otherwise marked

Black Alicant	**Lady Hampden, 1s 6d each**
Black Hamburg	**Madresfield Court**
Black Monukka	**Mrs. Hall's Perfection, 1s 6d ea.**
Black Prince	**Mrs. Pearson's Gol. Queen**
Bowood Muscat	**Mrs. Prince's Black Muscat**
Camden Sherry	**Muscat Hamburg**
Centennial	**Red Hanneport, 1s 6d each**
Champion Muscat, 1s 6d	**Sultana**
Chasselas Vibert	**Syrian**
Emperor	**Waltham Cross**
Gros. Colman	**Wantage**
Lady Downes	**White Hanneport**
Lady's Finger	

Grape Vines cannot be sent into Queensland from N.S.W. under any conditions.

Other fruits are admitted provided they are passed by the Government experts, who examine all plants and trees on arrival in Queensland.

The Orchard—Its Planting and Its Care

The Land.—On land of a fairly good depth, and open subsoil, digging or ploughing will be all that is required to prepare it for the fruit trees, but the question of drainage must not be overlooked unless a naturally drained slope has been selected; on strong, stiff soils drainage is absolutely necessary.

Planting.—Measure the land off into rows 25 to 30 feet apart, and the trees should stand at the same distance from each other in the rows, so that they will be 20 to 30 feet apart each way, and if the planting is done as shown, the trees will be in straight lines if looked at from any point, and will give the cultivator every facility to work between them. The holes to receive the trees should be dug out to a depth of 18 inches, and made wide enough to allow the roots of the young trees to spread out.

Manure.—If the land is virgin soil, or if it has been out of cultivation for some years, the breaking it up for the fruit trees will be sufficient to cause them to grow freely, but if the land is poor, a good dressing of bonedust or other manure can be given to the trees at a later date.

Aspect.—An easterly to a north-westerly spot should be chosen if possible. The matter of shelter, if not naturally provided, should have attention.

Time to Plant.—Deciduous fruit trees, such as Peaches, Plums, Cherries, etc., should be planted during June, July and August. Evergreen trees, such as Oranges, Lemons, etc., are best from April to June, and September to November.

Position for the Various Fruit Trees.—The highest parts should be allotted to Apricots, following on in succession in the order named down the slope, with Peaches and Nectarines, Plums, Apples, Pears and Quinces. The Citrus family (Oranges and Lemons) should be planted near the centre.

First Pruning of Young Trees.—When the deciduous trees are planted they should be cut back to the height fixed upon for the trunk. If there be no lateral branches, three buds only should be allowed to push out from the head of the tree. This will generally be the case with Apples and Pears, but Peaches and such-like will often have several lateral branches. In that case cut the leader to the height required, and cut off all the laterals except three near the top; these should be left to form the head, but should be shortened.

Grape Vines.—European Grape Vines should be placed five feet apart each way, in straight lines, that the plough may be used either across or along the vineyard. If the land be rich and deep, the distance between the vines should be increased to 6, 7 or 8 feet.

The Trees We Supply.

THE STOCKS USED. No point in the propagation of Fruit Trees is more important. This receives our very special attention. Trees which are worked either on unsuitable or unhealthy stocks will never prove satisfactory, and will always be a cause of disappointment.

Apples.—We work on Northern Spy Stocks, well free from the ground.
Pears.—On Seedling Pear; they will not sucker. Deep-rooting, very vigorous.
Cherries.—On Seedling Mazzard; without doubt by far the best Cherry stock.
Plums.—On Myrobolan and Mariana Seedlings—and some on Seedling Peach; best suited for warm districts.
Apricots—On Seedling Apricots, which we prefer, as in our opinion they produce better results; also on Peach and Plum Stocks, which some growers prefer.
Peaches, Nectarines, and Almonds.—On a Seedling Peach of robust and hardy constitution.
Vines.—On their own roots, and also on Phylloxera-resistant Stocks (see lists).

ORCHARD INSECT PESTS and Some Remedies

Our warm climate is particularly favourable to the development of insect pests. All may be kept in check or eradicated by the persistent use of remedies, and unless preventive means are taken the loss to the grower will continue to increase. Cleanliness in the orchard is absolutely essential, clearing up and burning off all fallen fruit, pruning dead wood and keeping the surface free from weeds, &c. Insects increase with wonderful rapidity; brood after brood may be produced in a few days.

Some Common Pests and Diseases.

APPLE BLIGHT—WOOLLY APHIS.—Brush the affected parts with kerosene emulsion diluted with two parts of water. Spraying is of no use.

CODLIN MOTH.—Bandage the trunks of trees; have these removed every 10 or 12 days, and dipped into boiling water. Pick up and burn all dropping fruit. Spraying Paris Green in spring is a preventive.

PEACH APHIS.—Spray every week in spring with Tobacco wash, no matter if strong, keep at it. Use weaker solution when fruit is forming—just as blossom falls.

SCALE ON ORANGES and SAN JOSE SCALE.—Kerosene Emulsion will keep these in check, but where possible use hydro-cyanic acid gas, and a liberal spraying of sulphur and lime.

FUNGOID DISEASES, such as Powdery Mildew, Apple Scab, Shot Hole Fungus, Peach and Plum Rust, can be kept in check by spraying with Bordeaux mixture for summer use, and Lime, Salt and Sulphur wash for winter use.

Recipes for Washes, &c.

KEROSENE EMULSION.—Kerosene ½ pint, soft soap 2-lbs., water 10-gals. Dissolve the soap by simmering in the water; while hot, add the kerosene, and thoroughly mix; this is best done by the spray pump, the whole being churned until thoroughly emulsified. This remedy is applied with a spray pump, and should not be used while the sun is hot, but in the evening or on cloudy days. Great care must be used in keeping the mixture agitated, and the vessel used to carry the mixture should be thoroughly emptied each time before re-filling, or the kerosene, which never thoroughly mixes, may accumulate and give too strong a dose. This contains a much smaller proportion of kerosene than usual, but expert opinion favours the more frequent use of a weaker mixture. Apply summer or winter. Add more kerosene in winter.

SULPHUR, LIME, AND SALT WASH.—Take 40-lbs unslacked lime, 20-lbs. sulphur, 15-lbs. salt and 20 gallons of water. To mix, take 10-lbs. lime, 20-lbs. sulphur, and 20 gallons of water; boil for 1½ hours, when the sulphur should be thoroughly dissolved; slack 30-lbs. of lime in a barrel with hot water, and, when thoroughly slacked, but still boiling, add the 15-lbs. of salt; when this is dissolved, the whole should be added to the lime and sulphur in the boiler, and the whole boiled for half-an-hour longer, when water, to make up 50 gallons, should be added. Strain through a sieve, and keep well stirred while in use. Apply when tree is leafless with a spray pump.

TOBACOO WASH FOR PEACH APHIS, &c.—Refuse tobacco (stems, &c.), 4 lbs.; soft soap, 1 lb.; water, 10 gals. Soak the tobacco in water for 24 hours, draw the liquor off, and boil the tobacco for three hours, to extract the nicotine. Mix the two liquors after having strained all refuse from that which has been boiled. Dissolve the soft soap by simmering in water, and add the tobacco water in the proportions named in formula. Apply with a spray pump in early spring, before the trees break into blossom. A little washing soda added to the above improves it.

PARIS GREEN.—Take 1 lb. of Paris Green, and add water sufficient to make a mixture the consistency of table mustard, then add 160 gallons of water. This must be kept well stirred whilst in use. This is also useful in destroying caterpillars on the vine, or any leaf or bark-eating insects.

AMMONIA-CARBONATE OF COPPER.—Dissolve 3 ozs. of carbonate of copper in 1 quart of strongest Liquid Ammonia, and when the chemical action has ceased, add 22 gallons of water. Apply with a spray pump. This is one of the best fungicides, and is suitable for nearly all fungus diseases.

BORDEAU MIXTURE.—Lime, 4 lbs.; bluestone, 4 lbs.; water, 40 gallons. Slack lime with a little water, then dissolve bluestone in a little HOT water. Stir well. A coarse nozzle is required for this wash.

For PUMPS, &c., see Sundries at end of List.

Anderson & Co.'s Select List of Trees, Shrubs & Plants

The cost of Packing must be added to prices named. The minimum charge is 6d for small orders, but 1s 6d to 2s will cover cost of packing a dozen plants

Abutilon

Boule de Niege. White. 3 ft. 1 0
Cloth of Gold. Golden. 6 ft. 1 0
Darwini Tesselatum. Leaves variegated. 3 ft... 1 6
Eclipse. Orange and purple. 6 ft. 1 0

Radicans Variegatus. 4 ft. 1 0

Euphorbia (Crown of Thorns)

Splendens. Crimson flowers; curious plant; 4 ft. 1 6

Eupomatia

Lauriana. Evergreen flowering shrub; 12 ft. .. 1 6

Fabiana

Imbricata. White; very hardy. 4 ft. 1 6

Fagus (Beech)

Sylvatica. 60 ft. 1 6
Sylvatica Cupreus. Copper coloured 2 0
Sylvatica Purpureus. 50 ft. 1 6

Ficus

Macrophylla (Moreton Bay Fig). 100 ft. .. 1 0
Australis (Port Jackson Fig). 60 ft. 1 0
Elastica (True India-rubber Tree). 2 6
Cunninghami. 25 ft. 1 6
Benjaminii (Queensland Weeping Fig).. .. 1 6
Religiosa. 25 ft. 1 6

Forsythia

Viridissima .. .. } Showy yellow flower- } 1 0
Variegata Aurea. 5 ft. } ing shrubs } 1 6

Fraxinus (Common Ash)

Excelsior. 50 ft. 1 0
Alba .. .. 1 0 Excelsior Aurea .. 2 6

Gardenia

Globosa. Flowers white and globular. 6 to 8 ft. 1 0
Intermedia. White; very free grower 1 6
Magnifica. 4 ft. 1 6
Radicans. 1 ft. .. 1 6 Thunbergi. 12 ft. 1 6

Genista

Alba. The white flowering broom. 8 ft. .. 1 0
Floridus. Yellow 1 0

Gleditshia (Honey Locust Tree)

Horrida. Splendid deciduous tree; 30 ft. .. 1 6

Goldfussia

Anisophilla. 3 ft. 1 0 Glomerata. 3 ft... 1 0

Graptophyllum

Earlii. Red flowering shrub from Q'land; 10 ft. 1 6

Grevillea (Silky Oak)

Robusta. Handsome evergreen tree; 40 ft. .. 1 0

Hakea

Eucalyptoides. Magnificent shrub with crim. flowers 1 0

Habrothamnus

Elegans. 6 ft. .. } Soft-wooded shrubs } 1 0
Scaber. Deep crimson } 1 0

Hardenbergia

Alba. Lovely shrub. 3 ft. 1 6

Hawthorn (see Cratœgus)

Heliotropium (Heliotrope)

In Variety. Favourite flowers 1 0

Hibiscus

Andersonii. Dark crimson, with dark eye. 6 ft. 1 6
General Courteges. Scarlet 1 6
Hardwoodi. Single pink, dark centre 1 6
Manyhot. Large, yellow, with black eye .. 1 6
Pedunculatus. Pale pink bell-shaped flowers .. 1 6
Several other varieties 1 6

Holly (see Ilex)

Horse Chestnut (see Æsculus)

Hydrangea

Cyanoclada. Dark blue 1 0
Empress Eugenie 1 6
Hortensis Variegata. 3 ft. 1 0
Otaska. Pink. 4 ft. 1 0
Paniculata Grandiflora. White. 4 ft. 1 0
Stellata Fimbriata 1 6
Thomas Hogg. Pure white. 4 ft. 1 0

Hypericum

Moserianum. Bright yellow 1 6
M. Tricolor Variegata 1 6

Hymenospermum

Flavum. Fragrant yellow flowers. 20 ft. .. 1 0

Ilex (Holly)

Aquifolium (English Holly) 1 0
Alba Marginata (Silver Holly) 1 6
Aurea (Golden Holly) 2 0
Cornuta (Chinese Holly) 1 0
Ferox Argentea Variegata 1 6
Paraguayensis (Mate Tree Plant of S. America) 1 6

Indigofera

Australis. Pink. 4 ft. 1 6
Decora. Pink and white. 2 ft. 1 6

Inga

Pulcherrima. Scarlet, tassel flower 1 6

Jacaranda

Mimosæfolia. Beautiful lavender flowers .. 1 6

Justicia

Adhatoda. White. 4 ft. 1 0
Carnea. Rose colour 1 6
Magnifica. Pink 1 0 Splendens. Pink.. 1 0

Kerria

Japonica. Yellow 1 0 Japonica fl. pl. .. 1 0

Lagerstræmia

Indica. Pink. 20ft. 1 6 Indica. Red .. 1 6
Indica Alba. White. 10 ft. 1 6

Lagunaria

Patersoni. Pink. 20 to 30 ft. 1 6

Lantana

Splendid flowering shrubs; 6 cols.; named varieties 1 0

Lasiandra

Heteromala. Blue 1 6
Macrantha Purple. 6 ft. 1 6
Rosea. Pink; very profuse bloomer 1 6

Laurus (Sweet Bay)

Nobilis. Beautiful evergreen; 30 ft. 1 6

Lavendula

Spica. Common Lavender 1 0
Stœchas. French Lavender 1 0

Ligustrum

Japonicum. 8 ft. 1 0
Lucidum. 12 ft. 7s 6d per100
Variegatum. 8 ft. 1 6 Ovatum. 8 ft. .. 1 6
Ovalifolum Areum Elegantissimum 1 6
Pubescens. 6 ft. .. .. 7s 6d per 100
Robustum Marginatum Aureum 1 6
Sinensis Minum Foliis Variegatus Aureuris .. 1 6
Vulgaris. 6 ft. .. .. 7s 6d per 100

Lilac (see Syringa)

Linum

Trigynum. Handsome dwarf winter flowerer .. 1 0

Liquidambar

Styraciflua (The Sweet Gum Tree) 1 6

Liriodendron

Tulipiferum (Tulip Tree). 60 ft. 1 6

Lophostemon

Australis. Handsome shelter tree; 40 ft. .. 1 0

Macadamia (Queensland Nut)

Ternifolia. Ornamental tree; 20 ft. 1 6

Mackaya

Bella. Lilac-purple. 6 ft. 1 0

Magnolia

Grandiflora. White. 25 ft. 1 6
Anonœfolia. (The Port Wine Magnolia) 8 ft. 1 6
Conspicua. Purple and white, deciduous. 20 ft. 1 6
Purpurea. Purple and white, deciduous. 15 ft. 1 6
Bicolor. 10 ft. 1 6
Fuscata. Synonymous with Anonœfolia .. 1 6

Malus (The Crab Apple)

In Variety. Covered with blossom in spring .. 2 0

Maple (see Acer)

Melaleuca (Ti Tree)

Hypericifolia. Hardy ornamental shrub; scarlet.. 1 6

Melastoma (see Lasiandra)

Melia

Azederach (Bead Tree or Chinese White Cedar) 1 0

Metrosideros

Tomentosus (New Zealand Christmas Bush) 25 ft. 1 6

Murraya

Exotica. Beautiful dwarf evergreen shrub; 6 ft. 1 6

Musa (Banana)

Ensete (Abyssinian Banana). Very handsome 2 6
Other varieties offered as Fruits in General List.

Myrtus (Myrtle)

Communis. 6 ft. 1 6
Romanus. White flowers. 6 ft. 1 6

Nandina

Domestica. Hardy dwarf shrub; 5 ft. .. 1 6

Nerium (Oleander)

Album. 15 ft. 1 6
Grandiflora. 20 ft. 1 6
Mdle. Dubois. Flowers single, pure white, 6 ft. .. 1 6
Punctatum. Beautiful shades of light pink. 5 ft. 1 6
Rosea Splendens. 12 ft. 1 6
Splendens Variegata, with gold variegation .. 1 6

Oak (see Quercus)

Olea (The Common Olive)

Europa. Suitable for hedges .. .. 10s per 100

Osmanthus

Illicifolius Variegata. 6 ft. 1 6

Trees, Shrubs & Plants – *(continued)*

Pæonia

Arborea (JAPANESE TREE PÆONY). Very showy. 4 ft.
A named collection of various shades, at 3s 6d each

Paulownia

Imperialis. 15 ft. 1 6

Pepper Tree (see Shinus)

Philadelphus (Mock Orange)

Coronarius. 4 ft. 1 0
Gordonianus. Large, single. 6 ft. 1 6
Grandiflorus. 4 ft. 1 0
Grandiflorus fl. pl. Double, very handsome .. 1 6
Microphyllus. Large white flowers, scented. 4 ft. 1 6
Mont Blanc. Large fragrant flowers. 5 ft. .. 1 6
Multiflorus Plenus. Large, double. 5 ft. .. 1 6
Primulæflorus 1 6
Speciosa. Single, sweetly scented. 6 ft. .. 1 6
Species Pekinensis. From Pekin 1 6

Phormium (New Zealand Flax)

Tenax. 5 ft. 1 0
Tenax Variegata. 5 ft. 1 6

Photinia

Serrulata (CHINESE HAWTHORN). 10 ft. .. 1 0
Glabra. 10 ft. 1 6

Pittosporum

Crassifolium. 12 ft. 1 0
Eugenoides. 15 ft. 1 0
Eugenoides Variegata. 12 ft. 1 6
Nana Compacta. 2 ft. in height; bushy habit
1s each; 9s doz.
Nigrescens 1 0
Nigrescens Variegata. 12 ft. 1 6
Tobira. 10 ft. 1 6
Tobira Variegata. 6 ft. 1 6
Undulatum. 25 ft. 1 0

Platanus (Plane)

Orientalis (ORIENTAL PLANE TREE). 50 ft. .. 1 0

Plumbago

Capensis. Lavender. 5 ft. 1 0
Capensis Alba. White flowers. 4 ft. 1 0
Larpentæ. Blue. 1 ft 1 0

Poinsettia

Albida Pure white bracts 1 6
Pulcherrima. Bright crimson. 12 ft. 1 6

Populus (Poplar)

In Variety 1 0

Poinciana

Regia (ROYAL PEACOCK FLOWER) 1 6

Protea

Mellifera (CAPE HONEYSUCKLE). Pink and yellow 1 6

Prunus

Pissardii. Ornamental species 1 6
Flore Rubra. Red 1 6
Alba Plena. Double white. 1 6
Mume. White, double 2 0
Mume. Red, double 2 0
Triloba. Double, rose 1 6
Double-flowering prune.

Psidium

Cattelyanum. Purple Guava 1 0
Pyriferum. Yellow Guava. 15 ft. 1 0
Parker's Hybrid. 15 ft. Largest yellow .. 1 0

Punica (Pomegranate)

Granatum (COMMON POMEGRANATE). 10 ft. .. 1 0
Granatum fl. pl. 10 ft. 1 6
Granatum Alba fl. pl. 10 ft 1 6

Pyrus (Cydonia)

Aucuparia (MOUNTAIN ASH) 1 6
Domestia. Splendid tree, with edible fruit .. 1 6

Queensland Nut (see Macadamia)

Quercus (Oak)

Coccinea. Scarlet 1 6 Ilex 1 6
Pedunculata (ENGLISH OAK). 60 ft. 1 0
Pallistris (AMERICAN EVERGREEN OAK). Red .. 1 6
Rubra. Red 1 6
Rubra Pyramidalis 1 6
Virens (EVERGREEN OAK). 40 ft. 1 6

Raphiolepis (Indian Hawthorn)

Indica. 4 ft. 1 0
Intermedia .. 1 0 Ovata. 4 ft. .. 1 0

Rhododendron

Album. 8 ft. .. .. from 2 6
Hybridum. 8 ft. .. .. from 2 6
Ponticum. Varieties. 8 ft. .. .. from 2 6

Rhondeletia

In Variety 1 6

Rhus (Autumn Foliage Plants)

Cotinus. Feathery flowers, yellow in autumn .. 1 6
Succedanica. Leaves bright crimson in autumn .. 1 0
Taxicodondron 1 0
Typhina (VINEGAR TREE). Velvety and hairy .. 1 6
Vernicifera (LACQUER TREE). Very ornamental 1 6

Robinia

Decaisneana. Rose, 30 ft. 1 6
Hispida Compacta. 15 ft. 1 6
Hispida Rosea (ROSE ACACIA). 4 ft. 1 6
Pseudo Acacia (BASTARD ACACIA). 40 ft. .. 1 0

Russellia

Juncea. 2 ft. .. 1 0 Multiflora. 4 ft. .. 1 6

Salix (Willow)

In Variety 1 0

Salvia (see Herbaceous Plants)

Sambucus

Argentea Variegata. Silver-leaved 1 0
Aurea Variegata. Golden-leaved. 12 ft. .. 1 0
Nigra (THE ELDERBERRY) 1 0
Roseaflora Plena. Double pink. 12 ft. 1 6

Schinus

Molle (CALIFORNIAN PEPPER TREE). 25 ft. .. 1 0
(For price per 100 see next column)

Schotia

Latifolia (WHITE KAFFIR BEAN TREE) 1 6
Speciosa. Scarlet 1 6

Silky Oak (see Grevillea)

Snowball Tree (see Viburnum)

Sollya

Heterophylla (AUSTRALIAN BLUE BELL) .. 1 0

Sophora

Japonica. White. 20 ft. 1 6

Sparmannia

Africana. White. 15 ft. 1 6
Africana fl. pl. Double-flowering white. 15 ft. 1 6

Spartium

Album Multiflorum 1 0
Scoparum 1 0
Junceum (SPANISH BROOM). Yellow 1 0

Spirea

Anthony Waterer. Crimson. 1 ft. 1 0
Aricefolia. Profuse bloomer 2 0
Californica. Pink. 2 ft. 1 0
Callosa Rubra .. 1 6 Douglassi. 3 ft. .. 1 0
Gracilis. Small, white, dwarf habit. 2 ft. .. 1 0
Grandiflora. 4 ft. 1 6
Hypericifolia (ITALIAN MAY). Single; white .. 1 0
Prunifolia fl. pl. 4 ft. 1 0
Reevesiana fl. pl. Double-flowering, white 4 ft. 1 0
Rupestris. White. 2 ft. 1 0

Stenocarpus

Cunninghamii (THE SCARLET UMBRELLA FLOWER TREE OF QUEENSLAND). 25 ft. 1 6

Sterculea

Acerifolia (FLAME TREE) 1 6
Diversifolia (KURRAJONG). 50 ft. 1 0
Heterophylla (BOTTLE TREE). 30 ft. 1 0

Strelitzia

Augusta. White. 10 ft. 1 6

Swainsonia

In Variety of Colours 1 0

Symphoria (Snowberry Tree)

Racemosa Aurea Variegata (THE GOLDEN-LEAVED SNOWBERRY TREE). 4 ft. .. 1 6
Racemosa. White berries. 3 ft. 1 6
Racemosa Fructo Rubra (THE RED-BERRIED SNOWBERRY TREE) 1 0

Syncarpia

Laurifolia (TURPENTINE) 1 0

Syringa (English Lilac)

Persica 1 6
Vulgaris. 12 ft. .. 1 6 Vulgaris Alba .. 1 6
A select collection of double flowering varieties 2 6

Tamarix

Gallica (FLOWERING CYPRESS). Pink. 12 ft. .. 1 0
Gallica Plumosa. An improvement on Gallica. 15 ft. .. 6

Tecoma

Capensis (SCARLET BIGNONIA). Suitable for hedge. 12 ft. 1 0
Smithii. Yellow, brown markings. 5 ft. .. 1 0
Velutina. Yellow. 15 ft. 1 0

Thea Bohea (Tea of Commerce)

Single white flowers and dark green foliage .. 1 0

Tilia

Argentia. (SILVER-LEAVED LINDEN TREE). 40 ft. 2 0
Europæa (LINDEN TREE). 40 ft. 1 6
Platyphyllos. Large leaved. 40 ft. 1 6

Tristania

Conferta. (See LOPHOSTEMON) 1 0
Laurina (THE SWAMP OAK). Handsome native tree. 15 ft. 1 6

Ulmus (Elm)

Campestris (ENGLISH ELM). 80 ft. 1 0
Chinesis (CHINESE ELM). 30 ft. 1 6
Suberosa (CORK BARK ELM) 1 6
Campestris Picturata Variegata 2 6
Campestris Louis Van Houtte. Golden 2 6
Medio Argenta Variegata. Silver and green .. 2 6
Montana Dovei 1 6
Vegata (HUNTINGDON ELM) 1 6

Veronica

In Variety 1 0

Vitex

Trifolia Variegata. 3 ft. 1 6

Virgilia

Lutea 1 6

Viburnum

Tinus (LAURUSTINUS). 8 ft. 1 0
Opulus (GUELDER ROSE OR SNOWBALL TREE) 10 ft. 1 0
Lucidum. White. Large shining leaves. 10 ft. 1 6
Sieboldtii. White. 3 ft. 1 6
Sinensis. White. 4 ft. 1 6
Suspensum. Yellow; sweet scented. 15 ft. .. 1 0

Weigelia (see Diervilla)

Willow (see Salix)

Yucca

Aloefolia Variegata. 8 ft. to 10 ft 2 6
Filamentosa. 4 ft. 1 0
Gloriosa (ADAM'S NEEDLE). 12 ft. 1 6
Quadricolor. 3 ft. 3 6 Recurva. 5 ft. .. 1 6

"The Roses and Ornamental Trees arrived, and were beautifully packed. They were quite fresh, and looked as if just removed from the garden."

JNO. KING, *Warren.—20-7-05.*

Regal, Show and Decorative

We can supply a collection of these. **1s 6d** each; **15s** doz.

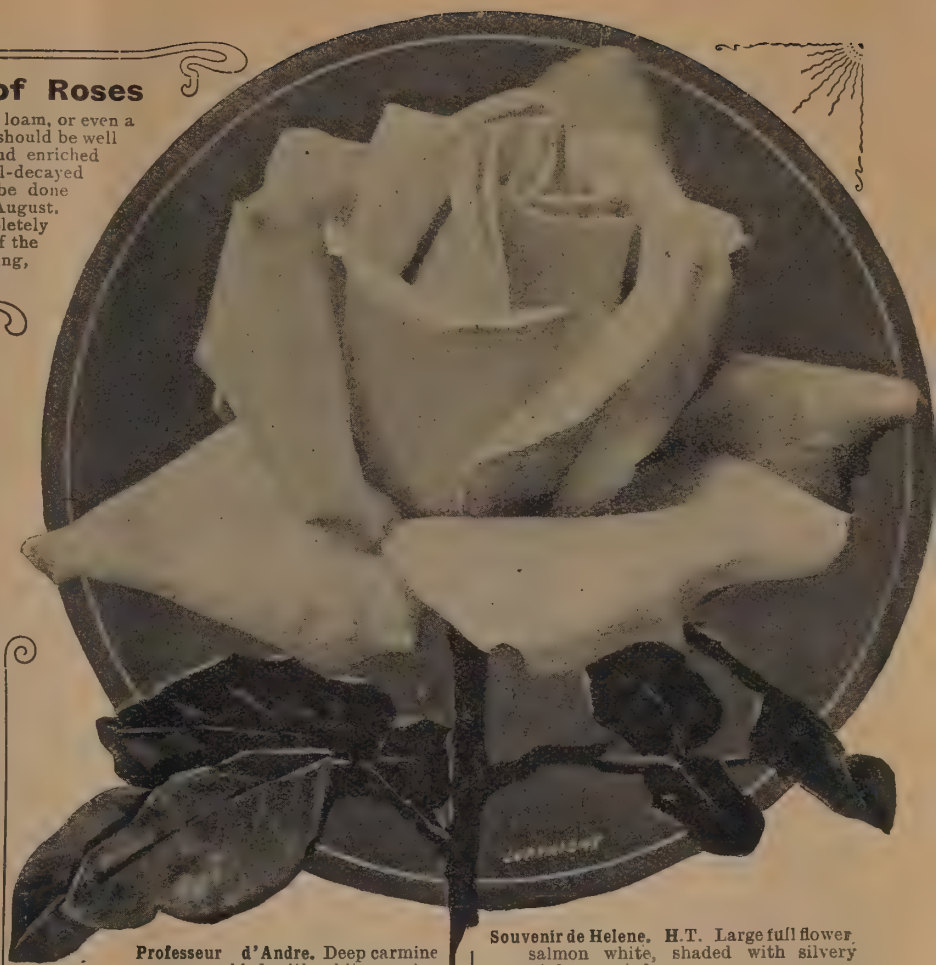
ROSES

Orders should reach us early to be forwarded when ready from 1st May

Cultivation of Roses

Roses prefer a strong deep loam, or even a stiff, clayey soil; the land should be well trenched and drained, and enriched with a liberal supply of well-decayed manure. Planting can be done from May to end of August.

When planting, the stocks should be completely buried in the ground so that only the branches of the true rose remain above ground. After planting, place a mulching of manure about each plant.



Recent Introductions & New Roses

Price: **1s 6d** each; **15s** per doz. (except otherwise priced).

Alice Lindsell. H.T. Creamy white, with pink centre, large, full, perfectly formed.

Ards Pillar. H.T. Exhibition, garden, and pillar Rose; blooms are produced with great freedom, and are large and full.

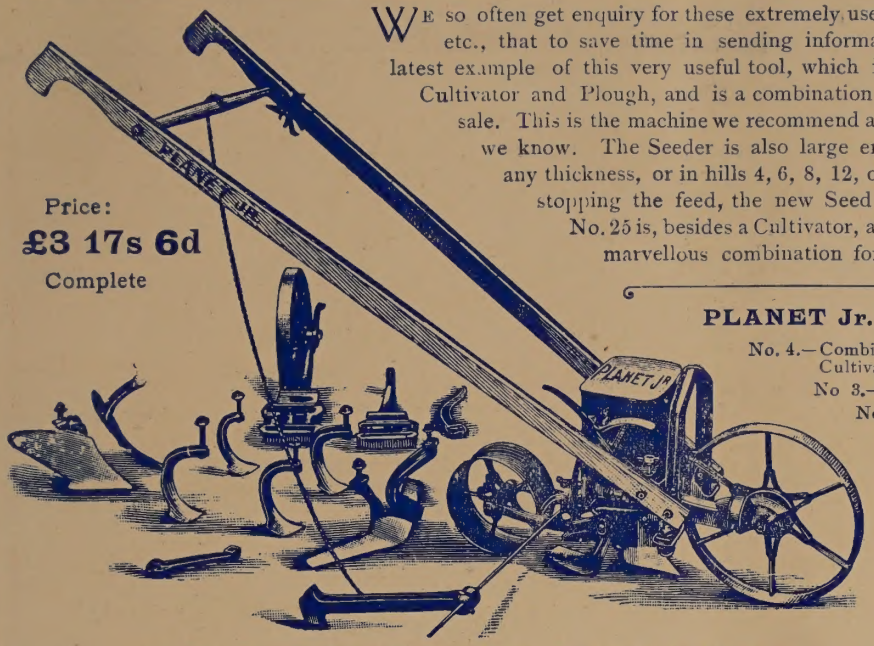
The "Planet Jr." Farm & Garden Tools



Price:
£3 17s 6d
Complete

No. 25 "Planet Jr." Combined Hill and Drill Seeder and Double Wheel Hoe, Cultivator and Plough

We so often get enquiry for these extremely useful Tools for Station Gardens, Market Gardeners, etc., that to save time in sending information and quoting prices, we are illustrating the latest example of this very useful tool, which is at once a Drill Seeder, Double Wheel Hoe, Cultivator and Plough, and is a combination of two machines, which have had a most extensive sale. This is the machine we recommend as the best all-round hand-power garden implement we know. The Seeder is also large enough for Farm work. No. 25 will sow in drills any thickness, or in hills 4, 6, 8, 12, or 14 inches apart. It has an automatic device for stopping the feed, the new Seed Index, and is absolutely accurate in its planting. No. 25 is, besides a Cultivator, a Plough, a Hoe (killing all weeds, etc.), and affords a marvellous combination for the cultivators of large vegetable gardens, etc.

PLANET Jr. HAND POWER IMPLEMENTS

No. 4.—Combined Hill and Drill Seeder, Single Wheel Hoe, Cultivator and Plough	£3 5 0
No 3.—Hill and Drill Seeder only	£2 15 0
No. 5.—Hill and Drill Seeder only	£3 5 0

ANDERSON'S LAWN KING
Ball-Bearing LAWN MOWER

12-inch ... 37s	16-inch ... 47s
14-inch ... 42s	18-inch ... 50s

Grass Catchers 2s 6d each for any size.

The advantages of ball-bearings are well understood. There is the same reason for their use on a lawn mower that there is on a bicycle, **to make it run easy**. While it runs so much easier and with less noise than other mowers, it cuts faster, cleaner, more evenly, does not push the grass before it, but cuts every spear, leaving the surface of the lawn perfectly smooth. All oil holes and adjusting screws are easily reached from the upper side. The roller adjustment is simple. The knife steel is the finest ever used on lawn mowers. Can be adjusted to cut as close as $\frac{3}{8}$th of an inch
